# THE ANDERSONS BARRICADE HERBICIDE III

# ACTIVE INGREDIENT:

Prodiamine: [N <sup>3</sup> ,N <sup>3</sup> -Di- <u>n</u> -propyl-2,4-dinitro-6-(trifluoromethyl)-m- phenylenediamine	. 0,48%
INERT INGREDIENTS:	99.52%
TOTAL:	100.0%

Guaranteed Fertilizer Analysis:

Nitrogen	32 %	(N)
Phosphorus	4 %	$(P_2O_5)$
Potassium	6%	(K <sub>2</sub> O)

Nitrogen from: Urea formaldehyde, Urea, Ammonia

For selective preemergence control of grass and broadleaf weeds in:

- established turf grasses (excluding golf course putting greens) and lawns
- Iandscape ornamentals (including perennial & wildflower plantings)

KEEP OUT OF REACH OF CHILDREN

# CAUTION

See the following section, <u>Precautionary Statements</u>, <u>Hazards To Humans and Domestic</u> <u>Animals</u>, for additional information.

Net Weight:

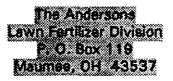

EPA Reg. No. 9198-125 EPA Est. No.

-

# NOTIFICATION

SEP 7 - 2001

€ ¢(():

BARRICADE® is a Registered Trademark of Sandoz, Ltd.

## PRECAUTIONARY STATEMENTS

# HAZARDS TO HUMANS AND DOMESTIC ANIMALS

## CAUTION

Causes moderate eye injury (irritation). Harmful if inhaled or absorbed through the skin. Avoid contact with skin, eyes, or clothing. Avoid breathing dust. Wash thoroughly with soap and water after handling. Prolonged or frequently repeated skin contact while handling the material may cause allergic reactions in some individuals.

#### Statements of Practical Treatment

If in eyes: Flush thoroughly with water for several minutes. Get medical attention if irritation persists.

If on skin: Wash with soap and water. Rinse thoroughly. Get medical attention if irritation persists.

If inhaled: Remove victim to fresh air.

#### **Environmental Hazards**

This product has low solubility in water. At the limits of solubility, this product is not toxic to fish. However, at concentrations above the level of water solubility, it may be toxic to fish. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to aquatic organisms in adjacent sites. Do not contaminate water when disposing of equipment washwaters.

# STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

#### STORAGE

Store in original container away from other fertilizer, feed, or food stuffs and separated from other pesticides.

#### PESTICIDE DISPOSAL

Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

#### CONTAINER DISPOSAL

<u>Plastic Containers</u>: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or; puncture and dispose of in a sanitary landfill or at an incineration facility, or; if allowed by state and local authorities, by burning locally. If burned, stay out of smoke.

<u>Paper and plastic containers:</u> Completely empty container into application equipment. Then dispose of empty container in a sanitary landfill or at an incineration facility, or; if allowed by state and local authorities, by burning locally. If burned, stay out of smoke.

<u>Fiber Drums</u>: Completely empty liner by shaking and tapping sides and bottom to loosen clinging particles. Empty residues into application equipment. Dispose of empty liner in a sanitary landfill or at an incineration facility if allowed by state and local authorities. If the drum cannot be reused, dispose of in a sanitary landfill or by incineration if allowed by state and local authorities.

## DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

This product is a selective preemergence herbicide that provides residual control of many grass and broadleaf weeds in turf grasses and landscapes. This product controls susceptible weeds by inhibiting weed seeds germination and root development. For most effective weed control this product must be incorporated by 0.5 inch of rainfall or irrigation. Incorporation should take place as soon as possible after application and should not be delayed past 14 days from the date of application.

Not for use on plants being grown (1) for sale or other commercial use, (2) for commercial seed production, or (3) for research purposes. For use on plants intended for aesthetic purposes or climatic modification and being grown in ornamental gardens or parks, or on golf courses or lawns and grounds.

Do not graze or feed livestock forage cut from areas treated with this product.

Do not apply this product through any type of irrigation system.

Do not apply aerially.

Do not apply to golf course putting greens.

#### Application Directions

Apply uniformly through suitable, calibrated commercial application equipment.

#### ESTABLISHED TURE

This product is a selective preemergence herbicide that, when properly applied, will control certain grass and broadleaf weeds in established turf grass and lawns. The species of turf grass determines the maximum amount of material that may be applied during a year.

Most effective weed control in turf grasses will be obtained when this product is activated by at least 0.5 inch of rainfall or irrigation within 14 days after application and prior to weed germination. See the map below for approximate crabgrass germination dates.

# CRABGRASS SEED GERMINATION DATES

Approximate Date

# Use Precautions

The following use precautions apply to the use of this product in turf grasses and lawns:

Application of this product may thin emerged annual bluegrass and newly over-seeded grasses.

Do not apply to OVERSEEDED TURF for 60 days after seeding or until after the second mowing, which ever is longer. Injury to desirable seedlings is likely if this product is applied before seedling secondary roots are in the second inch of soil, not thatch plus soil.

Do not apply to newly set sod until the following year.

Application of this product to turf stressed by drought, low fertility, or pest damage may result in turf injury.

Disturbing the herbicide barrier with cultural practices such as disking may result in reduced weed control.

Do not apply this product to putting greens or areas where dichondra, colonial bentgrass, velvet bentgrass or annual bluegrass (Poa annua) are desirable species.

# Maximum Annual Rates

This product should not be applied above a maximum annual rate of 313 lb.

# **Turf Species and Rates**

For season long control this product may be applied as a single application, or if needed followed by a second application for increased length of control. The length of time of residual weed control provided by this product is related to the rate applied. Use the higher rate within the listed range for longer control. Longer control is desirable in areas where crabgrass germinates between January 1 and April 20 (See Crabgrass Seed Germination Data Map).

Select maximum use rate based on turf grass species. All applications must be made prior to germination of the target weed seeds. This product will not control established weeds.

MAXIMUM RATE/CALENDAR YEAR of THE ANDERSONS BARRICADE HERBICIDE III by Turf Grass Species'					
Turf Species:	ID ANDERSONS BARRICADE III/A	lb ai/A			
Bermudagrass <sup>2</sup> Bahiagrass Centipedegrass Seashore Paspalum Tall Fescue (including turf-type) Zoysia		1.5			
Buffalograss Kentucky Bluegrass Perennial Ryegrass	209	1.0			
Creeping Red Fescue St. Augustinegrass	154	0.75			
Creeping Bentgrass	138	0.65			

Turf Species and Rates Table:

- <sup>1</sup> These are the maximum rate per calendar year by species limitations.
- <sup>2</sup> May be used on newly sprigged or plugged Bermudagrass at rates not to exceed 105 Ib/A. Newly sprigged or plugged Bermudagrass stolon rooting may be temporarily retarded. Suppression only of Foxtail, Goosegrass and Rescuegrass due to reduced product rates used in sprigging situations.

- Do not apply more than 313 lb of this product per calendar year.
- Use higher rates of this product to achieve higher levels of fertility and weed control for each turf type.

# Weeds Controlled

When used at the recommended rates (see Turf Species and Rates Table) this product will control:

Barnyard grass	Carpetweed
Blue grass, Annual (Poa annua)	Chickweed, Common
Crabgrass (large, smoth)	Henbit
Foxtails, Annual	Knotweed
Goosegrass'	Lambsquarter, Common
Johnsongrass (from seed)	Pigweed
Rescuegrass <sup>3</sup>	Purslane, Common
Signalgrass, Broadleaf	Shepherd's -purse <sup>2</sup>
	Spurge, Prostrate
	Woodsorrel, Yellow (from seed)

Do not exceed the maximum annual application rates recommended for the turf species. All applications must be made prior to germination of weed seeds. This product will not control established weeds.

- In many areas a single application of **138** to **313 ib/A** of this product will control goosegrass. However, under heavy goosegrass pressure and/or an extended growing season, make an initial application of **138** to **209 ib/A** followed after 60 to 90 days by a second application of **108 to 175 ib/A**, respectively, for season long goosgrass control. Do not exceed the maximum rate for turf grass species listed in the Maximum Annual Rate Table above.
- <sup>2</sup> Winter weeds are best controlled by applications made prior to germination: late summer, fall or winter timings.

<sup>a</sup> Suppression only.

# Overseeding/Reseeding

This product will inhibit the germination of turf species if overseeded/reseeded too soon after application. The interval between application and overseeding/reseeding is dependent on the application rate, soil temperature, and soil moisture. A shorter interval is possible if growing conditions are warm and wet, while a longer interval is needed if conditions are cool and dry.

Use the Overseeding/Reseeding Intervals Table below as a guide when choosing the appropriate overseeding/reseeding interval for each situation.

	Overseeding/Reseeding Interval (months) Based Upon Seeding Method and Predominant Soil Conditions for the Season					
This Product Rate (Ib/A)	Broadcast	Seeding	Drill Seeding			
•••••••	Wet and Warm	Cool and Dry	Wet and Warm	Cool and Dry		
108	4	6	3	4		
209	8	12	6	8		
313	12	18	9	12		

Overseeding/Reseeding Intervals Table:

# LANDSCAPE ORNAMENTALS (including Perennial and Wildflower Plantings)

This product may be applied for residual preemergence weed control in ornamentals.

# **Use Rates**

Apply this product at 138 to 313 lb/A in fall and/or spring. Use the higher rate of application for longer control periods. Sequential or single applications are allowed so long as the total amount of product applied does not exceed the maximum annual application rate of 313 lb/A.

#### Application Timing and Information

Apply this product prior to weed seed germination to the soil surface surrounding established tolerant ornamentals listed below. Delay application to allow soil to settle around new transplants and water thoroughly before applying this product. Apply this product after cuttings form roots and become established.

This product is a preemergence herbicide and will not control emerged weeds. Most effective weed control in ornamentals will be obtained when this product is activated by at least 0.5 inch of rainfall or irrigation, or with shallow (1 to 2 inches) mechanical incorporation, before weed seeds germinate. Acceptable control will be obtained when this product is activated within 14 days after application.

Best weed control is obtained when this product is applied to soil free of clods, weeds, and debris such as leaves and mulch. Prior to application of this product, control existing vegetation by hand weeding, cultivation or the use of an appropriate postemergence herbicide.

#### **Tolerant Ornamental Species**

This product will not harm most established ornamental trees, shrubs and flowers. The species listed below are tolerant to this product. Best results will be obtained when this product is uniformly applied to the soil surface; avoid applying to ornamental shoots which may defeat the effort to get uniform distribution on the soil surface. This product may be applied over the top of these species without injury.
