Application for Pesticide - Section I

1. Company/Product Number 9198-140	2. EPA Product Manager Miller	3. Proposed Classification ☒ None ☐ Restricted
4. Company/Product (Name) The Andersons Fertilizer with 0.426% Barricade	PM# 23	
5. Name and Address of Applicant (Include ZIP Code) The Andersons Lawn Fert. Div., Inc. d/b/a Free Flow Fert. PO Box 119 Maumee, OH 43537 ☐ Check if this is a new address	6. Expedited Review. In accordance with FIFRA Section 3(c)(3) (b)(i), my product is similar or identical in composition and labeling to: EPA Reg. No. _____ Product Name _____	

Section - II

☐ Amendment - Explain below.	☐ Final printed labels in response to Agency letter dated _____	NOTIFICATION JAN 10 2002
☐ Resubmission in response to Agency letter dated _____	☐ "Me Too" Application.	
☐ Notification - Explain below.	☐ Other - Explain below.	

Explanation: Use additional page(s) if necessary. (For section I and Section II.)

Notification of Alternate Brand Name per PR Notice 98-10 : The Andersons Golf Products Fertilizer 0-0-28 with Barricade Herbicide

This notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46 and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

Section - III

1. Material This Product Will Be Packaged In:				2. Type of Container	
Child-Resistant Packaging ☐ Yes ☒ No	Unit Packaging ☐ Yes ☒ No	Water Soluble Packaging ☐ Yes ☒ No	☐ Metal ☐ Plastic ☐ Glass ☐ Paper ☐ Other (Specify) _____		
* Certification must be submitted		If "Yes" Unit Packaging wgt. _____ No. per container _____	If "Yes" Package wgt. _____ No. per container _____		
3. Location of Net Contents Information ☒ Label ☐ Container		4. Size(s) Retail Container 50 lbs.		5. Location of Label Directions ☒ Label	
6. Manner in Which Label is Affixed to Product ☒ Lithograph Paper glued Stenciled		☐ Other _____			

Section - IV

1. Contact Point (Complete items directly below for identification of individual to be contacted, if necessary, to process this application.)			
Name Dawn L. Walters	Title Regulatory Administrator	Telephone No. (Include Area Code) 334-262-2766	
Certification I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law.			6. Date Application Received (Stamped)
2. Signature Dawn Walters	3. Title Regulatory Administrator		
4. Typed Name Dawn L. Walters	5. Date 12/7/01		

Fertilizer

Barricade
HERBICIDE

Active Ingredient:
Prochloraz (N₂, N₂-Di-g-propyl-2,4-dinitro-8-(trifluoromethyl)-m-phenylenediamine)..... 0.426%
Other Ingredients..... 99.574%
Total..... 100.00%

Barricade is a registered trademark of Syngenta Crop Protection.

Guaranteed Analysis:
Soluble Phosphorus (P₂O₅)..... 28.00%
Total Sulfur (S)..... 9.52%
g 52% Free Sulfur (S)..... 2.00%
Iron (Fe)..... F292
Plant nutrients derived from Potassium Sulfate and Ferrous Oxide.

For selective pre-emergence control of grass and broadleaf weeds in established turfgrasses (excluding golf course putting greens), and lawns.

KEEP OUT OF REACH OF CHILDREN PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS CAUTION

Causes moderate eye injury (irritation). Harmful if inhaled or absorbed through the skin. Avoid contact with skin, eyes, or clothing. Avoid breathing dust. Wash thoroughly with soap and water after handling. Prolonged or frequently repeated skin contact while handling the material may cause allergic reactions in some individuals.

ENVIRONMENTAL HAZARDS

This product has low solubility in water. At the limits of solubility, this product is not toxic to fish. However, at concentrations above the level of water solubility, it may be toxic to fish. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to aquatic organisms in adjacent areas. Do not contaminate water when disposing of equipment washwaters.

FIRST AID

IF IN EYES: Flush thoroughly with water.
Get medical attention if irritation persists.
IF ON SKIN: Wash with soap and water.
Rinse thoroughly.
Get medical attention if irritation persists.
IF INHALED: Remove victim to fresh air.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. **STORAGE:** Store in original container & away from other fertilizer, feed, or food stuffs and separated from other pesticides. **PESTICIDE DISPOSAL:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. **CONTAINER DISPOSAL:** Completely empty container into application equipment. Then dispose of empty container in a sanitary landfill or at an incineration facility, or if allowed by state and local authorities, by burning locally. If burned, stay out of smoke.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

This product is a selective pre-emergence herbicide that provides residual control of many grass and broadleaf weeds in turfgrasses and landscapes. This product controls susceptible weeds by inhibiting weed seeds germination and root development. For most effective weed control this product must be incorporated by 1/2 inch of rainfall, irrigation or shallow mechanical incorporation. Incorporation should take place as soon as possible after application and should not be delayed past 14 days from the date of application.

Not for use on plants being grown (1) for sale or other commercial use, (2) for commercial seed production, or (3) for research purposes. For use on plants intended for aesthetic purposes or climatic modification and being grown in ornamental gardens or parks, or on golf courses or lawns.

Do not graze or feed livestock forage cut from areas treated with this product. Do not apply this product through any type of irrigation system. Do not apply serially. Do not apply to golf course putting greens.

APPLICATION DIRECTIONS

Apply uniformly through suitable, calibrated commercial application equipment.

ESTABLISHED TURF

This product is a selective pre-emergence herbicide that, when properly applied, will control certain grass and broadleaf weeds in established turfgrasses and lawns. The species of turf grass determine the maximum amount of material that may be applied during a year.

Most effective weed control in turfgrasses will be obtained when this product is activated by at least 1/2 inch of rainfall or irrigation within 14 days after application and prior to weed germination. See map below for approximate crabgrass germination dates.

CRABGRASS SEED GERMINATION DATES

Approx. Date
1 - After May 30
2 - After May 10
3 - After April 20
4 - After March 20
5 - Jan. 1 to March 2

The following use precautions apply to the use of this product in turfgrasses and lawns: Application of this product may thin emerged annual bluegrass and newly overseeded grasses. Do not apply to OVERSEEDING TURF for 60 days after seeding or until after the second mowing, whichever is longer. Injury to desirable seedlings is likely if this product is applied before seeding secondary roots are in the second inch of soil, not thatch plus soil.

Do not apply to newly set and until the following year. Application of this product to turf stressed by drought, low fertility, or pest damage may result in turf injury. Disturbing the herbicide barrier with cultural practices such as dethatching may result in reduced weed control. Do not apply this product to putting greens, or areas where dichondra, centuri bennetgrass, velvet bennetgrass or annual bluegrass (Poa annua) are desirable species.

Maximum Annual Rates

This product should not be applied above a maximum annual rate of 352 lbs./A.

Turf Species and Rates

For season long control this product may be applied as a single application, or if needed followed by a second application for increased length of control. The length of time of residual weed control provided by this product is related to the rate applied. Use the higher rate within the listed range for longer control. Longer control is desirable in areas where crabgrass germinates between January 1 and April 20 (see Crabgrass Seed Germination Date map).

Select maximum use rate based on turfgrass species. All applications must be made prior to germination of the target weed seeds. This product will not control established weeds.

Turf Species and Rate Table

MAXIMUM RATE/CALENDAR YEAR of this product Turf Grass Species ¹		
Turf Species	Lbs. this product	Lbs. of A
Bermudagrass ²	352	1.5
Cenopodgrass, Bahiagrass		
Stachytarpheta		
Tall Fescue (including turf-type)		
Zoysia		
Kentucky Bluegrass	235	1.0
Perennial Ryegrass, Buffalograss		
Creeping Red Fescue	174	0.75
St. Augustinegrass		
Clawgrass	150	0.65

¹ These are the maximum rates per calendar year by species limitations.

² May be used on newly sprigged or plugged Bermudagrass at rates not to exceed 122 lbs/A. Newly sprigged or plugged Bermudagrass seedling rooting may be temporarily retarded. Suppression on only of Fodder. Goosegrass and Rescuegrass due to reduced product rate used in sprigging situations.

Do not apply more than 352 lbs. of this product per calendar year.

Use higher rates of this product to achieve higher levels of fertility and weed control for each turf type.

WEEDS CONTROLLED

When used at the recommended rates (see Turf Species and Rates Table) this product will control: Crabgrass (large, smooth), Annual Bluegrass (Poa annua), Goosegrass, Annual Foxtail, Broadleaf Signalgrass, Johnsongrass (from seed), Rescuegrass³, Carpetweed, Common Chickweed, Common Lambsquarters, Common Purslane, Hairy, Knotweed, Pigweed, Prostrate Spurge, Shepherds-purse, Yellow Woodchickweed (from seed).

Do not exceed the maximum annual application rates recommended for the turf species. All applications must be made prior to germination of weed seeds. This product will not control established weeds.

³ In many areas a single application of 155 to 352 lbs./A of this product will control Goosegrass. However, under heavy Goosegrass pressure and/or an extended growing season, make an initial application of 155 to 235 lbs./A followed after 80 to 90 days with a second treatment of 122 to 197 lbs./A for season long Goosegrass control. Do not exceed the maximum rate for turfgrass species listed in the Maximum Annual Rate Table above.

⁴ Winter weeds are best controlled by applications made prior to germination: late summer, fall or winter timings.

⁵ Suppression only.

OVERSEEDING/RESEEDING

This product will inhibit the germination of turf species if overseeded/reseeded too soon after application. The interval between application and overseeding/reseeding is dependent on the application rate, soil temperature, and soil moisture. A shorter interval is possible if growing conditions are warm and wet, while a longer interval is needed if conditions are cool and dry. Use the Overseeding/Reseeding Interval Table below as a guide when choosing the appropriate overseeding/reseeding interval for each situation.

OVERSEEDING/RESEEDING INTERVALS TABLE

Overseeding/Reseeding Interval (months)
Based Upon Seeding Method and Predominant
Soil Conditions for the Season

This Product Rates (lbs./A)	Broadcast Seeding		Drill Seeding	
	Wet & Warm	Cool & Dry	Wet & Warm	Cool & Dry
122	4	6	3	4
235	6	12	5	8
352	12	18	9	12

IMPORTANT: READ BEFORE USE:
