**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**When to Apply Easy Weed 'n Green:**

Apply as early as possible in the growing season to take advantage of the season-long weed control it provides. You may apply anytime during the growing season around established flowers, roses, shrubs, trees and anytime prior to setting transplants. Do not use on flower seeds. For best results follow directions carefully.

**How to Apply Easy Weed 'n Green:**

Since Easy Weed 'n Green doesn't kill weeds but prevents them from appearing, first remove existing weeds and cultivate to prepare a smooth soil surface.

**For Established Plant Application** on roses, shrubs, trees and flowers 2" to 3" tall, (see special section for use on vegetables), sprinkle Easy Weed 'n Green evenly over the entire soil surface using enough to match this picture. This surface application rate equals 1 oz. per 10 sq. ft.

**Surface Application Rate**

Sprinkle Easy Weed 'n Green  
as shown on soil surface.

Do not apply when foliage is wet. Best results are obtained by lightly washing into soil after application. **For all-season weed control and plant feeding make second application 4 weeks after first application.**

**For Pre-Planting Application** apply at the rate of 1 oz. per 10 sq. ft. before setting transplants. Gently rake in. Do not use with flower seeds. Gladiola corms less than 1 inch in diameter may be injured by pre-plant application. Best results will result when lightly watered in. **For all-season weed control and plant feeding make second application 4 week after first application.**

**For Use on Vegetables**, apply this two-way product as both a weed control and plant food in certain vegetables crops as directed below. Application may be made as much as 10 weeks prior to planting direct seeded vegetables and anytime prior to setting transplants. Remove all existing weeds first then lightly cultivate to prepare a smooth soil surface. Rate of application depends on type of soil. Apply at 1 lb. per 320 sq. ft. (16 ft. X 20 ft.) for heavy clay type soils and at 1 lb. per 640 sq. ft. (20 ft. X 32 ft.) for light soils. Gently rake into the top 1-3 inches of soil within 24 hours of application.
