Subject: Label Notification(s) for Pesticide Registration Notice 2007-4 and 98-10
Storage & Disposal and Other Changes (Warranty Statement – Marketing Claims)

Dear Registrant:

The Agency is in receipt of your Application(s) for Pesticide Notification under Pesticide Registration Notice (PRN) 2007-4 and 98-10 dated April 9, 2009 for:

**EPA Registration 9198-190 Andersons Golf Products Fertilizer Plus
Fungicide VII**

The Registration Division (RD) has conducted a review of this request for applicability under PRN 2007-4 and 98-10 and finds that the label change(s) requested falls within the scope of PRN-2007-4 and 98-10. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please contact me directly at 703-305-6249 or Banza Djapao of my staff at 703-305-7269.

Sincerely,

A handwritten signature in black ink, appearing to be "Linda Arrington".

Directions for Use

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes.

For use on turfgrass areas consisting of Kentucky bluegrass, annual bluegrass, bentgrass, perennial ryegrass, fine fescue, bermudagrass or mixtures where these grasses predominate.

TO PREVENT DOLLAR SPOT, ANTHRACNOSE AND RUST (*Puccinia* spp.), apply to moist or dry foliage at the RECOMMENDED RATE when environmental conditions favor disease activity. Repeat the application at two week intervals throughout the expected disease period.

TO CONTROL ACTIVE DOLLAR SPOT, ANTHRACNOSE AND RUST (*Puccinia* spp.), apply at the DOUBLE RATE to moist or dry foliage at two week intervals. When the disease activity is under control, apply at the RECOMMENDED RATE at two week intervals.

TO PREVENT BROWN PATCH, apply to moist or dry foliage at the DOUBLE RATE when environmental conditions favor disease activity. Repeat at two week intervals throughout the expected disease period.

TO CONTROL ACTIVE BROWN PATCH, use a non-fertilizer fungicide such as Andersons Golf Products Fungicide VII to limit the amount of fertilizer applied since high levels of nitrogen applied to turf during or just prior to the onset of hot, humid weather may increase the severity of brown patch. Follow with the RECOMMENDED RATE of either product once the disease is controlled.

Note carefully

To avoid product pickup, lightly irrigate treated areas soon after application.

On short cut bentgrass (less than 1/2") when temperatures are above 80° F, apply only to dry foliage.

Storage and Disposal

Do not contaminate water, food, or feed by storage or disposal.

STORAGE: Store in a clean, dry place. Reseal opened bag by folding top down and securing. Protect from water and extreme heat.

PESTICIDE DISPOSAL: Do not contaminate water, food, or feed by storage or disposal. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Completely empty bag into application equipment.
