Ms. Dawn L. Walters
Regulatory Administrator
THE ANDERSONS, INC.
P.O. Box 119
Maumee, OH 43537

Dear Ms. Walters:

This is in response to your request dated March 7, 2002 to change the primary brand name for EPA Registration 9198-204 from Fungicide IX to:

ANDERSONS GOLF PRODUCTS FUNGICIDE IX

Your request for the name change is accepted and the change will be made to the Agency's records. All future correspondence on this product should reference the new name.

Sincerely yours,

Sherada D. Hobgood

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes.

Adapted for use in all areas where listed turf diseases attack turfgrasses.

TO PREVENT GRAY AND PINK SNOW MOLD, apply to dry foliage at the NORMAL or MEDIUM RATE prior to the first snow. Repeat in mid-Winter when turf is free of snow and again immediately after the final snow melts in the Spring. In areas where snow cover is present the entire Winter, apply at the HIGH RATE prior to the first snow and follow with a NORMAL RATE when the snow melts in the Spring, if needed.

TO PREVENT PYTHIUM BLIGHT (when weather conditions are favorable: high temperature and humidity, day and night), apply to moist foliage at the NORMAL or MEDIUM RATE and repeat at 5-7 day intervals while weather conditions persist.

TO CONTROL ACTIVE PYTHIUM BLIGHT, apply to moist foliage at the MEDIUM RATE as soon as symptoms are observed and repeat as needed if weather conditions remain favorable. For severe attack, apply a HIGH RATE application to moist foliage and repeat at a NORMAL RATE as needed. If disease symptoms do not subside, use a second HIGH RATE application in 5-7 days.

TO PREVENT DOLLAR SPOT*, COPPER SPOT AND BROWN PATCH, apply to dry or moist foliage at the NORMAL or MEDIUM RATE when disease activity is noted or suspected, repeat at 2-3 week intervals. During periods of high day and night temperatures and humidity, treatment intervals may need to be shortened for best brown patch control.

TO CURE DOLLAR SPOT, COPPER SPOT AND BROWN PATCH, when symptoms indicate advanced stages, apply at the MEDIUM or HIGH RATE and follow with the NORMAL RATE preventive program.

*If dollar spot control is not effective after using this product as recommended, a thiophanate-methyl or benomyl-tolerant strain of fungi may be present. Consult your ProTurf Tech Rep for recommendations of suitable ProTurf Fungicides to use promptly.

ON NEW SEEDINGS, apply at MEDIUM RATE just after sowing seed. After germination or at first sign of disease, apply to moist foliage and repeat at 7-10 day intervals if evidence of disease persists.

DRY FOLIAGE APPLICATIONS should be made to prevent snow mold. For prevention or control of Pythium blight, prolonged contact with the foliage enhances activity.

ON GREENS AND FAIRWAYS, it is suggested to apply the product to moist foliage in the morning and evening, followed by a light syringing before mowing or allowing heavy play.

Do not apply in a brisk wind.

5/6

PRECAUTIONS

Allow one week between the application of this and other control products. (This guideline can be relaxed where severe insect or disease attack requires immediate treatment).

When treating Pythium and brown patch for control on established turf, do not fertilize or water heavily during periods when disease is active.

Storage and Disposal

Do not contaminate water, food, or feed by storage and disposal.

STORAGE: Store in clean, dry place. Reseal opened bag by folding top down and securing.

PESTICIDE DISPOSAL: Do not contaminate water, food, or feed by storage or disposal. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or be incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

Suggested Spreader Settings					
To provide proper distribution calibrate spreader before application.					
42.24 lbs. treats 22,000 ft ² (1/2 acre) at the RECOMMENDED RATE					
42.24 lbs. treats 11,000 ft ² (1/4 acre) at the DOUBLE RATE					
42.24 lbs. treats 7,333 ft ² (1/8 acre) at the HEAVY RATE					
SPREADER SETTING					
SPREADER	GROUND OR PTO SPEAD	WIDTH OF COVERAGE	NORMAL RATE	MEDIUM RATE	HIGH RATE
Gandy - 30"	X mph	Overlap wheels	X	X	X
Scotts Rotaries* R-7, R-7X R-8, R-8A (cone 8)	X mph	XX feet	X	X	X
Lely Model	X mph	XX feet	X	X	X
Vicon	X mph	XX feet	X	X	X

For the R-7X model use with adjustable pattern slide 1/4 closed.
Lely models WTR, WFR, HR and 1250. PT) at 450 rpm.

Note to EPA: actual spreader models may vary depending on market demand and availability

PRODUCT RATE:
 NORMAL = 1.92 lbs. product/1,000 sq ft (1.0 + 0.5 oz ai/M)
 MEDIUM = 3.84 lbs. product/1,000 sq ft (2.0 + 1.0 oz ai/A)
 HIGH = 5.76 lbs. product/1,000 sq ft (3.0 + 1.5 oz ai/A)
