Directions for Use

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes.

For use on turfgrass areas consisting of Kentucky bluegrass, annual bluegrass, bentgrass, perennial ryegrass, fine fescue, zoysiagrass, tall fescue, bermudagrass, St. Augustinegrass, or mixtures where these grasses predominate.

TO PREVENT DOLLAR SPOT, ANTHRACNOSE, POWDERY MILDEW AND RUST (*Puccinia* spp.) apply to moist or dry foliage at the **RECOMMENDED RATE** when environmental conditions favor disease activity. Repeat at two week intervals throughout the expected disease period.

TO CONTROL ACTIVE DOLLAR SPOT, ANTHRACNOSE, POWDERY MILDEW AND RUST (*Puccinia* spp.) apply at the **DOUBLE RATE** to moist or dry foliage at two week intervals. When the disease activity is under control, apply at the **RECOMMENDED RATE** at two week intervals.

TO PREVENT BROWN PATCH apply to moist or dry foliage at the **DOUBLE RATE** when environmental conditions favor disease activity. Repeat at two week intervals throughout the expected disease period.

TO CONTROL ACTIVE BROWN PATCH use a non-fertilizer fungicide such as ~~ProTurf Fungicide~~ **Golden Eagle** to limit the amount of fertilizer applied since high levels of nitrogen applied to turf during or just prior to the onset of hot, humid weather may increase the severity of brown patch. Follow the **RECOMMENDED RATE** of either product once the disease is controlled.

TO PREVENT NECROTIC RING SPOT AND SUMMER PATCH apply to moist or dry foliage at the **HEAVY RATE**. Begin in the spring when conditions are favorable for disease development. Make 2-4 applications at monthly intervals. For best results water in after application.
