

CHEMI-TROL SOIL STERILANT

Concentration: Diatomaceous Earth Weed Killer Wettable Powder

Active Ingredients:

Boron, 1% (mono-Boron citrate, trisodium borate)	15.0
Diatomaceous Earth (40% diatomaceous earth, 60% talc)	67.2
Ammonium sulfate (21% nitrogen)	20.0

U.S.D.A. Registration No.

(CAUTION) MAY IRRITATE EYES, NOSE, THROAT,
AND SKIN.

Avoid Breathing Dust or Spray Mist.

Avoid Contact with Skin, Eyes, and Clothing.

(Keep Out of Reach of Children) 12 pt.

CONTENTS 12 PT.

IMPORTANT: Do not apply, or drain, or flush equipment on or near desirable trees, or other plants, or on areas where their roots may extend, or in locations where the chemical may be washed or moved into contact with their roots. Do NOT use on lawns, walks, driveways, tennis courts, or similar areas. Prevent drift of dry powder or spray to desirable plants. Do NOT contaminate domestic waters. Keep from contact with fertilizers, insecticides, fungicides, and seeds.

Thoroughly clean all traces of CHEMI-TROL SOIL STERILANT from application equipment immediately after use; otherwise, injury to desirable vegetation may result when equipment is used again. Flush tank, pump, hoses, and boom with several changes of water after removing nozzle tips and screens (clean these parts separately).

GENERAL INFORMATION: CHEMI-TROL SOIL STERILANT weed killer is a wettable powder to be mixed in water and applied as a spray on non-cropland areas where bare ground is desired. It is an effective general herbicide for the control of many annual and perennial weeds. Effects are slow to appear and may not become apparent until the chemical has been carried into the root zone of the weeds by moisture. The degree of control and duration of effect will vary with the amount of chemical applied, weather, humidity, and other conditions.

CHEMI-TROL SOIL STERILANT is non-corrosive, non-volatile, non-flammable, and non-explosive under normal conditions of use.

Keep out of reach of children.

DIRECTIONS

Apply CHEMI-TROL SOIL STERILANT just before or during the period of active growth of weeds. Sufficient moisture from rainfall or artificial means is necessary after treatment to carry the chemical into the root zone of the weeds. If dense growth is present results will be improved if vegetation is removed before treatment. Do not apply when ground is frozen.

Before applying, clean the equipment to remove any foreign material which may have been introduced into the sprayer. Weigh the proper amount of CHEMI-TROL SOIL STERILANT and mix into necessary volume of water (at least 1/2 gallon per lb. of CHEMI-TROL SOIL STERILANT).

Mixing must be kept in suspension at all times by continuous agitation. For spot or small areas, use fixed boom power sprayers properly calibrated to insure constant rate of application. Openings in screen should be equal to or larger than 0.015 in. Agitate by mechanical or hydraulic means in the spray tank. If a spray or return line is used, it should terminate at bottom of the tank to minimize foaming. Do not use air agitation. For treating small areas, a tank-type hand sprayer or sprinkler can may be used; shake or stir frequently.

GENERAL WEED CONTROL

To control most weeds for an extended period of time on non-cropland areas such as RAILROAD AND PIPELINE RIGHT OF WAYS, PETROLEUM TANK FARMS, LUMBERYARDS, STORAGE AREAS, HIGHWAY AND INDUSTRIAL PLANT SITES:

Apply 5 to 16 lbs. of CHEMI-TROL SOIL STERILANT per acre to control most annual weeds such as foxtail, ryegrass, crabgrass, cheatgrass, bromegrass, ragweed, and lambs-quarter.

Apply 16 - 32 lbs. per acre to control most perennial weeds and grasses such as smooth brome, bluegrass, red top, quackgrass, aster, dandelion, and plantain.

Apply 32 - 64 lbs. per acre to control johnsongrass; use at the same rate for nontoxic perennial weeds and grasses such as Bermudagrass, morning glory, dogbane, bracken fern, and horsetail.

Use the higher levels of the dosage ranges on adsorptive soils, (usually those having organic matter or carbon).

CHEMI-TROL SOIL STERILANT

Combination Diuron and Bromacil Weed Killer Wettable Powder

Active Ingredients:

Bromacil (5-bromo-3-sec-butyl-6-methyluracil)	16.8%
Diuron [β -(3,4-dichlorophenyl)-1,1-dimethylurea]	63.2%
Inert Ingredients	20.0%

U. S. D. A. Registration No.

(CAUTION!) MAY IRRITATE EYES, NOSE, THROAT,
AND SKIN.
Avoid Breathing Dust or Spray Mist.
Avoid Contact with Skin, Eyes, and Clothing.

(Keep Out of Reach of Children) 12 pt.

IMPORTANT: Do not apply, or drain, or flush equipment on or near desirable trees, or other plants, or on areas where their roots may extend, or in locations where the chemical may be washed or moved into contact with their roots. Do NOT use on lawns, walks, driveways, tennis courts, or similar areas. Prevent drift of dry powder or spray to desirable plants. Do NOT contaminate domestic waters. Keep from contact with fertilizers, insecticides, fungicides, and seeds.

Thoroughly clean all traces of CHEMI-TROL SOIL STERILANT from application equipment immediately after use; otherwise, injury to desirable vegetation may result when equipment is used again. Flush tank, pump, hoses, and boom with several changes of water after removing nozzle tips and screens (clean these parts separately).

GENERAL INFORMATION: CHEMI-TROL SOIL STERILANT weed killer is a wettable powder to be mixed in water and applied as a spray on non-cropland areas where bare ground is desired. It is an effective general herbicide for the control of many annual and perennial weeds. Effects are slow to appear and may not become apparent until the chemical has been carried into the root zone of the weeds by moisture. The degree of control and duration of effect will vary with the amount of chemical applied, soil type, rainfall, and other conditions.

CHEMI-TROL SOIL STERILANT is non-corrosive, non-volatile, non-flammable, and is low in toxicity to man and animals under recommended conditions of use.

Do NOT re-use container. Destroy when empty.

DIRECTIONS

"STAKILL" is an effective industrial herbicide designed to be applied with the very minimum of equipment and ease of application.

NON-CROP WEED CONTROL:

"STAKILL" may be applied at any time of the year and is an effective industrial herbicide for the control of many annual and perennial grass and herbaceous weeds on non-cropland areas where bare ground is desired. The degree of control and duration of effect will vary with the amount of "STAKILL" applied, soil type, rainfall, and other conditions.

"STAKILL" may be applied any time of the year for non-cropland weed control provided adequate moisture is supplied by rainfall or artificial means. Best results are obtained if applied shortly before weed growth begins. If dense growth is present, remove tops of weeds and apply to ground.

GENERAL WEED CONTROL:

To control most weeds for an extended period of time on non-cropland such as UTILITY, HIGHWAY, PIPELINE and RAILROAD RIGHT OF WAYS, PETROLEUM TANK FARMS, LUMBERYARDS, STORAGE AREAS, INDUSTRIAL PLANT SITES, and AROUND FARM BUILDINGS apply 100-200 lbs. per acre for control of most annual weeds. Apply 200-300 lbs. per acre for control of both annual and perennial weeds, up to 400 lbs. per acre and repeat treatment may be required where a longer period of control is desired or when hard-to-kill, deep-rooted perennial weeds such as Johnson Grass are present.

FOR SMALL AREAS:

Apply 1 lb. per 100 sq. ft. or 10 lbs. per 1,000 sq. ft.

NOTICE TO BUYERS:

Seller makes no warranty of any kind, express or implied, concerning the use of this product. BUYER assumes all risk of use or handling whether in accordance with directions or not.
