

**NEW FORMULA
ALL CLEAR³
CONCENTRATED POOL CHLORINE**

- Features a dry chlorine that dissolves immediately.
- A most effective germicide and algicide.
- Will not cause cloudiness in water.
- Will not add scale forming minerals in the water.
- Will maintain your pool crystal clear.

The control of pH is greatly simplified using All Clear 3 concentrated Pool Chlorine. In fact, you will require from 2 to 4 times the amount of acid usually applied. All Clear 3 concentrated Pool Chlorine provides a more stable form of chlorine for easier maintenance of an effective chlorine residual in pool water for disinfecting action. It requires less storage space and contains constant strength regardless of storage time. It is economical to use in that, after the pool is stabilized, you will need only 1/2 oz. All Clear 3 concentrated Pool Chlorine less often.

INSTRUCTIONS: When starting up a new pool, a preliminary to satisfy chlorine demand and to establish a chlorine residual of 1.0 ppm to 1.5 ppm available chlorine. To accomplish this, add 2 oz. All Clear 3 concentrated Pool Chlorine per 1,000 gallons of pool water. The next morning, add All Clear 3 cyanuric acid at the rate of 4 oz. per 1,000 gallons to stabilize the pool.

All Clear 3 concentrated Pool Chlorine should be added daily or as needed at the rate of 1/2 to 1 oz. per 1,000 gallons of pool water to maintain a chlorine residual in all times of 1.0 ppm to 1.5 ppm as determined by a suitable test kit. The pH should be maintained between 7.2 and 7.6.

A shock treatment should be made every week during hot weather or after heavy rains. Less frequent shock treatments may be made during cool weather. For the shock treatment, add 2 oz. of All Clear 3 concentrated Pool Chlorine per 1,000 gallons of pool water. Swimmers should not be permitted in the pool after the shock treatment until the chlorine residual has reached the 1.00 ppm to 1.5 ppm range.

Keep in mind that a slight acidity must be maintained in the event of heavy accumulations of dust and dirt caused by storms or super heavy bathing loads which require additional treatment as needed to maintain the chlorine residual between 1.0 ppm and 1.5 ppm.

Corrosive causes eye damage. Do not get in eyes or on skin. Do not breathe vapors. Causes skin, nose and throat irritation. Wear safety goggles, dust respirator and protective clothing when handling. May cause burns if swallowed. May cause burns to skin.

WARNING
This product is toxic to fish. Treated pool water should not be discharged where it will drain into streams, ponds or public water. Do not use water for cleaning of equipment or disposal. Apply this product only as specified on label.

FIRST AID:
In case of personal contact remove material and flush skin or eyes with water for at least 15 minutes. For medical attention, clean contaminated clothing before reuse. If swallowed, feed gruel or cookies followed by olive oil or cooking oil. Physician immediately.

DANGER:
Strong oxidizing agent. Moisture and heat may liberate irritating and toxic chlorine containing gases. Decomposes at 350-475 F with liberation of harmful fumes. In case of decomposition, if possible, container in open air or well ventilated. Flood with large volume of water. Store in cool, dry place. Do not mix with water. Do not mix with pool chemicals. Use only dry cleaning utensils. Store in a cool dry place. Do not reuse container. Rinse container thoroughly with water.
