

ALL-CLEAR POOL START

Recommended for use just once to start your pool with fresh water. Then use All Clear 3 Concentrated Pool Chlorine to maintain the chlorine residual. All Clear Pool Start is a conditioner which prepares your pool for All Clear 3 Concentrated Pool Chlorine, and permits immediate chlorine effectiveness and economy. All Clear Pool Start satisfies chlorine demand of swimming pool water by oxidizing organic matter and reducing the number of bacteria and algae. It simultaneously provides cyanuric acid (s-triazinetriene) to stabilize chlorine.

INSTRUCTIONS FOR USE

1. Clean or backwash filter.
2. Using a reliable test kit, test the pH level and adjust it to 7.2 to 7.6 (if it is above 7.6, add acid; if it is below 7.2, add soda ash or sodium bicarbonate).
3. In the amount shown in the table below — add All Clear Pool Start slowly through the surface skimmer.
4. Wait two hours and again adjust pH to 7.2 to 7.6.
5. Test chlorine residual with a reliable test kit. Do not allow swimmers in pool until chlorine residual has dropped below 2.0 ppm.
6. Add All Clear 3 Concentrated Pool Chlorine according to package directions to maintain a minimum chlorine residual of 1.0 to 1.5 ppm at all times.

DOSAGE CHART

Pool Capacity (gals.)	To Provide 25 ppm Cyanuric Acid and 10 ppm Available Chlorine.		To Provide 20 ppm Cyanuric Acid and 80 ppm Available Chlorine.

DANGER

KEEP OUT OF REACH OF CHILDREN

Corrosive causes eye damage. Do not get in eyes or on skin. Do not breathe dust. May cause skin, nose and throat irritation. Wear safety goggles, dust respirator and protective clothing when handling. May be fatal if swallowed. May cause burns to broken skin.

WARNING

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment or disposal of wastes.

Apply this product only as specified on this label.

FIRST AID

In case of personal contact remove excess material and flush skin or eyes with cold water for at least 15 minutes. For eyes get medical attention. Clean contaminated clothing before reuse.

If swallowed, feed gruel or cooked cereal followed by olive oil or cooking oil. Call a Physician immediately.

DANGER

Strong oxidizing agent. Moisture contamination may liberate irritating and hazardous chlorine-containing gases. Decomposes at 350-475° F with liberation of harmful gases. In case of decomposition, if possible isolate container in open air or well ventilated area. Flood with large volume of water if necessary.

Mix only with water. Do not mix with other pool chemicals. Use only dry, clean measuring utensils. Store in a cool dry place. Keep closed when not being used.

Do not reuse container. Rinse empty container thoroughly with water and discard.
