1" TABLETS

CHLORINATING TABLETS (Approximate weight of each tablet: 0.5 oz.)

For use in swimming pool floaters and feeders (trichloro s triazine none)

ACTIVE INGREDIENT Trichloro s Triazine none 99%

INERT INGREDIENTS 1%

AVAILABLE CHLORINE 90%

KEEP OUT OF REACH OF CHILDREN NET WT 10 LBS

DANGER: SEE FIRST AID AND OTHER PRECAUTIONS ON SIDE PANEL

NOV 23 '90

STATEMENT OF PRACTICAL TREATMENT (FIRST AID): IF SWALLOWED, promptly drink a large quantity of water. DO NOT induce vomiting. Get medical attention. Avoid alcohol. Never give anything by mouth to an unconscious person. IF ON SKIN, immediately brush off excess chemical and flush with cold water for at least 15 minutes. Remove contaminated clothing. Wash clothing before reuse. If irritation persists, call a physician. IF IN EYES, Flush with cold water for at least 15 minutes. Get medical attention. IF INHALED, remove person to fresh air. Call a physician. NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS - Hazard to humans and domestic animals.

DANGER:

HIGHLY CORROSIVE. CAUSES IRREVERSIBLE EYE DAMAGE. CAUSES BURNS TO SKIN. IRRITATING TO NOSE AND THROAT. MAY BE FATAL IF SWALLOWED. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Avoid breathing dust or fumes. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS - This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with NPDES Permit. For guidance, contact the regional office of EPA.

PHYSICAL OR CHEMICAL HAZARD - STRONG OXIDIZING AGENT. WILL BURN WITH THE EVOLUTION OF CHLORINE AND EQUALLY TOXIC GASES. CONTACT WITH WATER SLOWLY LIBERATES IRRITATING AND HAZARDOUS CHLORINE-CONTAINING GASES. DECOMPOSES AT 480°F. to 490°F. WITH LIBERATION OF HARMFUL GASES. Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of fire, contamination or decomposition, do not reseat container. If possible isolate container: in open air or well ventilated area. Flood with large volumes of water, if necessary.

PRECAUTION - Chemical should not come in direct contact with surface of vinyl liner, fiberglass, acrylic, colored plaster or painted pools and spas. Danger, do not pour in storm! Do not mix with other chemicals.

DIRECTIONS FOR USE - It is a violation of Federal law to use this product in a manner inconsistent with its labeling. When starting up a new pool, superchlorinate to satisfy chlorine demand and to establish a chlorine residual of 1.0 ppm to 1.5 ppm available chlorine. To accomplish this, add 2 oz. FRESH & CLEAN Swimming Pool Sanitizer per 1,000 gallons of pool water. The next morning add FRESH & CLEAN Cyanuric Acid to stabilize the pool according to directions given on the label. FRESH & CLEAN Chlorinating Tablets are designed for use in Trichloro-S-Triazinetrione devices. Follow the manufacturer's directions for refilling and adjusting the feed rate for the proper available chlorine level. Test pool water frequently with a suitable test kit and maintain a chlorine residual of 1.0 to 1.5 ppm minimum range of residual chlorine. If the residual chlorine is above 1.5 ppm, adjust the cartridge to the next smaller number. An increase in weather temperature, bath load or water temperature will cause your pool to use more chlorine. You should increase the feed rate accordingly. If the cartridge is at the maximum setting, the pumping time should be increased to compensate for the increased usage. When the tablets are nearly exhausted, superchlorinate and refill when the chlorine residual of the pool reaches 1.5 ppm. Keep the pH between 7.2 and 7.6 as determined by a suitable test kit.

STORAGE AND DISPOSAL:

STORAGE - Store in original container and keep container tightly closed away from heat or open flame. Store in a cool, dry, well ventilated place. Do not allow water to get into container. Keep container off wet floors.

PRODUCT DISPOSAL - Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL - Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.
