

ALL-CLEAR JUMBO TABLETS

- A most effective algaecide.
- Will not cause cloudiness in water.
- Will not add scale forming minerals in the water.

INSTRUCTIONS

When starting up a new pool, superchlorinate to satisfy chlorine demand and to establish a chlorine residual of 1.0 ppm to 1.5 ppm available chlorine. To accomplish this, add 2 oz. All-Clear 3 Concentrated Pool Chlorine per 1,000 gallons of pool water. The next morning add All-Clear 3 Cyanuric Acid to stabilize the pool according to directions given on the label.

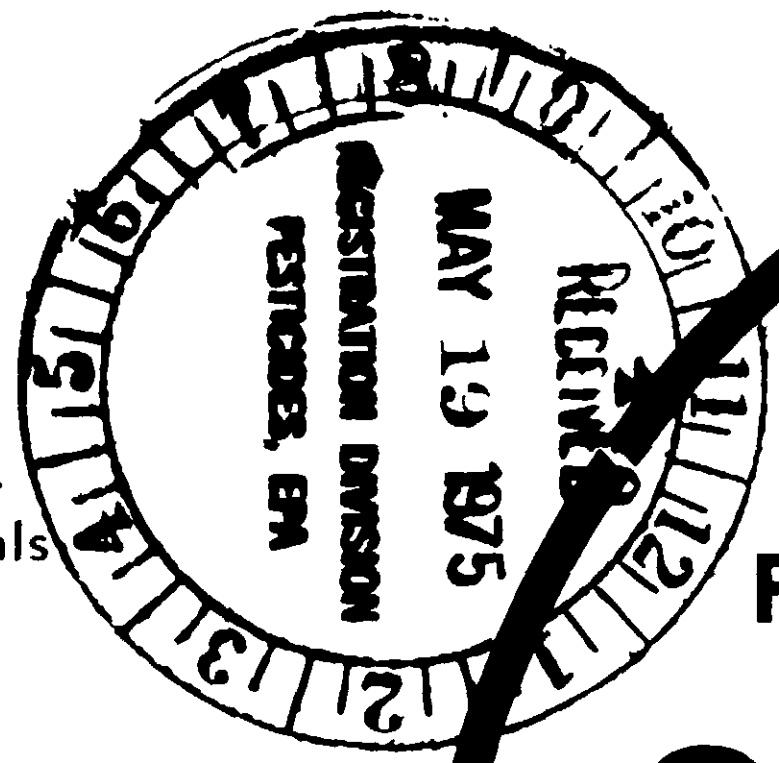

Test pool water frequently with a standard test kit and maintain a chlorine residual of 1.0 to 1.5 ppm as determined by daily or more frequent use of a chlorine test kit. Immerse one All-Clear Jumbo Tablet or more until residual is obtained per part 5-20 to 10 to 20 gallons of pool water by means of a feeder float skimmer dispenser or directly into the skimmer or other pool entry into the pool. Add 1 tablet to the pool for each 5,000 gallons. Vary amount of water temperature, water level, etc. to determine proper amount of tablets to use. Do not use in hot tubs or whirlpools.

Do not use in swimming pools with salt water. Do not use in hot tubs or whirlpools.

Keep the pH in range of 7.2 to 7.8. Adjust pH as necessary.

DANGER

KEEP OUT OF REACH OF CHILDREN

Corrosive causes eye damage. Do not get in eyes or on skin. Do not breathe dust. May cause skin, nose and throat irritation. Wear safety goggles, dust respirator and protective clothing when handling. May be fatal if swallowed. May cause burns to broken skin.

FIRST AID

In case of personal contact remove excess material and flush skin or eyes with cold water for at least 15 minutes. For eyes get medical attention. Clean contaminated clothing before reuse. If swallowed, feed gruel or cooked cereal followed by olive oil or cooking oil. Call a Physician immediately.

DANGER

Strong oxidizing agent. Moisture forms a toxic, corrosive, irritating and hazardous chlorine-containing gas. Do not heat above 350-475°F with liberation of harmful vapors. Store in cool, dry place in pestle isolate container in well ventilated area. Flood with large volume of water if spilled. Mix only with water. Do not mix with other chemicals. Use only dry, clean measuring utensils. Store in pestle isolate container closed when not being used. Do not reuse container. Flush empty container thoroughly with water and discard.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and aquatic life. Do not apply to water bodies. Do not apply to areas where water runoff is likely to occur. Do not apply to areas where water runoff is likely to occur.

ALL CLEAR³ CYANURIC ACIDTM

DIRECTIONS:

Add 4 oz. of All Clear 3 Cyanuric Acid for each 1,000 gallons of pool water. This will provide approximately 30 ppm. Pools with temperatures above 75° F. will need larger amounts of All Clear 3 Concentrated Pool Chlorine for the first few weeks. After adding All Clear 3 Cyanuric Acid, regular use of All Clear 3 Concentrated Pool Chlorine will provide a desirable chlorine residual and maintain the recommended cyanuric acid level. Maintain a cyanuric acid level of 30-50 ppm using a suitable test kit. If chlorine products, with a "built-in" stabilizer are used with All Clear 3 Cyanuric Acid, then maintain a minimum of 1.5 ppm chlorine residual. Otherwise, maintain a chlorine residual of 1.0 to 1.5 ppm.

CAUTION:

SKIN IRRITANT — KEEP OUT OF REACH OF CHILDREN

Avoid inhalation of dust. May be harmful if swallowed. Avoid contact with skin. If splashed in eyes, flood with water for 15 minutes.

Do not reuse container. Rinse empty container thoroughly with water and discard.

ACTIVE INGREDIENT: Cyanuric Acid 100%

DAIRIES AND CREAMERIES

Wash clean, then use one ounce TIP TOP SANITIZER to each three gallons water to sanitize hand washed bottles, cans, strainers, coolers, vats, pasteurizers, separators, ice cream freezers, etc.

In most cases of sanitizing the equipment, etc., in Milk, Cheese, Butter and Ice Cream plants, the dilution table of parts per million of active chlorine will give you your proper amounts of TIP TOP SANITIZER to use per gallons of water.

TIP TOP SANITIZER	WATER	P.P.M.
1 oz.	3 gal.	150
1 oz.	2 gal.	225
1 oz.	1 gal.	450

TIP TOP SANITIZER is quick acting, leaves no sediment, yet it thoroughly mixes immediately and is very economical to use.

Tip Top
SANITIZER

**SODIUM
HYPOCHLORITE SOLUTION
GERMICIDE BACTERICIDE
DEODORANT DISINFECTANT**

Active Ingredients:

Sodium Hypochlorite	6.0%
Inert Ingredients	94.0%

CAUTION: Keep out of reach of children. See side panel for further cautions.

ONE U.S. GALLON

MANUFACTURED FOR
TIP TOP DAIRIES CO. • HILLSBORO, KANSAS

DAIRY FARM USE

Wash clean, then use one ounce TIP TOP SANITIZER to each three gallons water to sanitize cans, pails, coolers, milking machines, strainers, etc., also cows' udders, teats and milker's hands.

For further information check with parts per million table at left side of label.

WATER CHLORINATION

For wells, cisterns and pond water, use 1 oz. TIP TOP SANITIZER to approx. 1000 gals water. This will give approx. .5 P.P.M.'s. With approx. 15 hours retention period, this will sanitize the average water. In extreme cases, use 1½ oz. TIP TOP SANITIZER to approx. 1000 gals. water.

CAUTION

Harmful if swallowed, prolonged contact may cause skin and eye irritation.

DO NOT MIX WITH ACID
