Garden Grove, CA 92643

Gentlemen:

Subject: All-Clear Jumbo Tablets  
EPA Registration No. 9215-7  
Submission of November 19, 1984

The amendment referred to above, submitted in connection with registration under FIFRA, is acceptable provided that you:

1. Make the labeling changes listed below before you release the product for shipment bearing the amended labeling:
  - a. Change the heading "Instructions" to "Directions For Use."
  - b. The Misuse Statement: "It is a violation of Federal law to use this product in a manner inconsistent with its labeling" must appear under the heading Directions for Use and preceding the use directions. (See 40 FR 28281).
2. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(a). Your release for shipment of the product bearing the amended labeling constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely yours,

A. E. Castillo  
Product Manager (32)

## ALL-CLEAR JUMBO TABLETS

- A most effective algacide •
- Will not cause cloudiness in water •
- Will not add scale forming minerals to the water •

### DANGER: KEEP OUT OF REACH OF CHILDREN

Corrosive. Causes eye damage. Do not get in eyes or on skin. Do not breathe dust. May cause skin, nose and throat irritation. Wear safety goggles, dust respirator and protective clothing when handling. May be fatal if swallowed. May cause burns to broken skin.

### FIRST AID

In case of personal contact remove excess material and flush skin or eyes with cold water for at least 15 minutes. For eyes get medical attention. Clean contaminated clothing before reuse. If swallowed, drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person. Get medical attention.

### DANGER

Strong oxidizing agent. Moisture contamination may liberate irritating and hazardous chlorine containing gases. Decomposes at 350°-475° with liberation of harmful gases. In case of decomposition, if possible isolate container in open air or well ventilated area. Flood with large volume of water if necessary. Mix only with water. Do not mix with other pool chemicals. Use only dry, clean measuring utensils. Store in cool dry place. Keep closed when not being used.

### ENVIRONMENTAL HAZARDS

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment or disposal of wastes.

### STORAGE AND DISPOSAL

Keep product dry in tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition, isolate container, if possible, and flood with large amounts of water. Do not reuse empty container. Triple rinse thoroughly with water. Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

### INSTRUCTIONS

#### APPLY THIS PRODUCT ONLY AS SPECIFIED ON THIS LABEL

When starting up a new pool, superchlorinate to satisfy chlorine demand and to establish a chlorine residual of 1.0 ppm to 1.5 ppm available chlorine. To accomplish this, add 2 oz. All-Clear® Concentrated Pool Sanitizer per 1,000 gallons of pool water. The next morning add All-Clear® Cyanuric Acid to stabilize the pool according to directions given on the label.

Test pool water frequently with a suitable test kit and maintain a chlorine residual of 1.0 to 1.5 ppm at all times (as determined by daily or more frequent use of a chlorine test kit). Immerse one All-Clear Jumbo Tablet (or more until residual is obtained) for each 5,000 to 10,000 gallons of pool water by means of feeder, float, skimmer dispenser, or directly into the skimmer (but never directly into the pool, as discoloration of the pool liner or paint could occur). Variables such as water temperature, water flow rate, filter cycles, bather loads and methods of application will affect the dissolution speed of the tablet and therefore the rate of flow of chlorine solution into the pool. During the summer and peak bather loads, superchlorinate at least twice monthly as directed above. Keep the pH between 7.4 and 7.6 as determined by a suitable test kit.
