There is one package for this product;

An ASTM Type 1-D .5, 1, 3.5, and 5 gallon tapered side wall, plastic, open head pail, with a plastic, continuously threaded pail lid. The lid contains a lever closure. The package is opened by holding down the lever on the pail lid while unscrewing the lid counter clockwise and lifting it off the pail. When closed the lever fits into a groove on the inside of the pail neck so the lid can not be unscrewed. The M&M LIFELATCH closure is used. Both pail and closure is a matched unit from M&M Industries.

Wear goggles or face shield and rubber gloves when handling. Avoid breathing dust or fumes. Remove and wash contaminated clothing before reuse.

**ENVIRONMENTAL HAZARDS:** This pesticide is toxic to fish and aquatic organisms.

**PHYSICAL OR CHEMICAL HAZARD - STRONG OXIDIZING AGENT.** WILL BURN WITH THE EVOLUTION OF CHLORINE AND EQUALLY TOXIC GASES. CONTACT WITH WATER SLOWLY LIBERATES IRRITATING AND HAZARDOUS CHLORINE-CONTAINING GASES. DECOMPOSES AT 460°F. to 480°F. WITH LIBERATION OF HARMFUL GASES. Mix only with water. Use clean, dry utensils. **Do not add this product to any dispensing device containing remnants of any other product.** Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of fire, contamination or decomposition, do not reuse container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

**Do not add this product directly into a swimming pool or spa as discoloration of plastic**  
Additional container sizes: 5-10-25-35 LB

liner or painted pool surface may occur. Do not place in the skimmer. Do not mix with other chemicals.

**DIRECTIONS FOR USE - It is a violation of Federal law to use this product in a manner inconsistent with its labelling.** When starting up a new pool, superchlorinate to satisfy chlorine demand and to establish a chlorine residual of 1.0 ppm to 1.5 ppm available chlorine. To accomplish this, add 2 oz. FRESH & CLEAN Swimming Pool Sanitizer per 1,000 gallons of pool water. The next morning, add FRESH & CLEAN Cyanuric Acid to stabilize the pool according to directions given on the label. Test pool water frequently with a suitable test kit and maintain a chlorine residual of 1.0 to 1.5 ppm at all times (as determined by daily or more frequent use of a chlorine test kit). Immerse one FRESH & CLEAN 3" Tablet (or more until residual is obtained) for each 5,000 to 10,000 gallons of pool water by means of feeder or float (but never directly into the pool, as discoloration of the pool liner or paint could occur). Variables such as water temperature, water flow rate, filter cycles, bather loads and methods of application will affect the dissolution speed of the tablet and therefore the rate of flow of chlorine solution into the pool. During summer and peak bather loads, superchlorinate at least twice monthly as directed above. Keep the pH between 7.2 and 7.6 as determined by a suitable test kit.

## STORAGE AND DISPOSAL:

**Do not contaminate water, food, or feed by storage or disposal.**

**PESTICIDE STORAGE:** Store in original container, tightly closed away from heat or open flame. Store in a cool, dry, well ventilated place. Keep container off wet floors.

**PESTICIDE DISPOSAL:** Do not put spilled product, filled or partially filled containers in the trash. Dispose of waste material according to label use directions otherwise call 1-800-CLEANUP for guidance from your local solid waste agency.

**CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container.** Triple rinse container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or mix tank. Fill the container 1/4 full with water and recap. Shake for ten seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. **Offer for recycling if available, or place in trash.**
