

DANGER: HIGHLY CORROSIVE. CAUSES SKIN AND EYE DAMAGE. MAY BE FATAL IF SWALLOWED. DO NOT GET IN EYES, ON SKIN OR ON CLOTHING.

Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

PRACTICAL TREATMENT (First Aid): If swallowed: Feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately. If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists get medical attention. If in eyes: Flush with cold water for at least 15 minutes. Get immediate medical attention.

CHEMICAL HAZARDS: Strong oxidizing agent. Do not use moist or damp utensils. Do not use in any automatic chlorinating device. Such use may lead to contamination with other pool chlorinating compounds which may lead to fire or explosion. Mix only with water. Contamination with moisture, garbage, dirt, organic matter or other chemicals including other pool chemicals or pool chlorinating compounds, or any other foreign matter such as household products, cyanuric acid pool stabilizers, soap products, paint products, solvents, acids, vinegar, beverages, oils, pine oil, dyes, rags, etc., may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not re-seal container. If possible, isolate container in open air or well-ventilated area. Flood with large volumes of water if necessary.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not contaminate lakes, ponds, or streams by cleaning of equipment or disposal of wastes.

DIRECTIONS FOR USE—GENERAL CLASSIFICATION: It is a violation of federal law to use the product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container if possible and flood with large amounts of water. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area or bury in a safe place.

EPA Est. No. 9215-CA-1

EPA Reg. No. 9215-8-AA

CONCENTRATED

ALL CLEAR⁴

GRANULATED

SWIMMING POOL SANITIZER

Active Ingredient:
Sodium dichloro-s-triazinetriene . . . 100%
AVAILABLE CHLORINE . . . 62%

NET WT 4.5 lbs.
9215-8 (2.057 kg.)

DANGER:

KEEP OUT OF REACH OF CHILDREN
• SEE FIRST AID AND OTHER PRECAUTIONS ON SIDE PANEL •

HOW TO CALCULATE POOL CAPACITY
1. Measure length, width and depth of pool in feet.
2. Multiply length by width by depth.
3. Divide the result by 2.2 to get gallons.
4. Multiply gallons by 8.34 to get pounds of water.
5. Multiply pounds of water by 1.25 to get pounds of chlorine.
6. Divide pounds of chlorine by 62 to get pounds of ALL CLEAR.
7. Divide pounds of ALL CLEAR by 16 to get ounces of ALL CLEAR.
8. Divide ounces of ALL CLEAR by 16 to get cups of ALL CLEAR.
9. Divide cups of ALL CLEAR by 16 to get pints of ALL CLEAR.
10. Divide pints of ALL CLEAR by 2 to get quarts of ALL CLEAR.
11. Divide quarts of ALL CLEAR by 4 to get gallons of ALL CLEAR.

IMPORTANT NOTES
1. ALL CLEAR is a concentrated chlorinating sanitizer. It is 100% available chlorine.
2. Since it is granular, the ALL CLEAR can be added to the pool with liquids. ALL CLEAR is fast dissolving. It maintains its high strength in a cool, dry place. ALL CLEAR contains a built-in stabilizer. Sunlight pools contain no scale-forming minerals which can coat tubes and on the sides of the pool.

HOW TO CALCULATE POOL CAPACITY

1. Measure the length, width, and depth of the pool in feet.

2. Multiply length by width by depth.

3. Divide the result by 2.2 to get the number of gallons.

4. Multiply the number of gallons by 8.34 to get the number of pounds of chlorine.

IMPORTANT NOTES

1. ALL CLEAR⁴ is a concentrated chlorinating sanitizer. It is 100% active and 100% soluble. Since it is granular, the ALL CLEAR⁴ can be added to the pool without the splashing associated with liquids. ALL CLEAR⁴ is fast dissolving. It maintains its high strength for at least one year if kept in a cool, dry place. ALL CLEAR⁴ contains a built-in stabilizer to reduce chlorine loss in sunny pools. It contains no scale-forming minerals which can collect on the walls of the heater tubes and on the edges of the pool.
