FILE COPY

Subject: All Clear 3 Granular Swimming Pool & Spa Sanitizer
EPA Reg. No. 9215-9
Application Dated: April 6, 2010
Receipt Date: April 14, 2010

Dear Mr. Allred:

The following notification submitted in connection with registration under the provisions of PR Notice 98-10, Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) section 3(c)9 is acceptable.

Proposed Notification:

- Revised Storage and Disposal section per PR Notice 2007-4

Comments:

Based on a review of the material submitted, the following comments apply:

This application for notification to revise the storage and disposal section, as referenced above, is acceptable. A copy has been placed in our records for future reference.

Should you have any questions concerning this letter, please contact me at Henson.Wanda@epa.gov or call (703) 308-6345.

Sincerely,

Wanda Henson
Acting Product Manager (32)
Regulatory Management Branch II
Antimicrobials Division (7510P)

FIRST AID

If swallowed: Call a poison control center immediately for treatment advice. Have the person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or a doctor. Do not give anything by mouth to an unconscious person.

If in eyes: Hold eyelids open and rinse slowly with water for 15 to 20 minutes. Remove contact lenses if present after 5 minutes then continue rinsing eye. Call poison control center or doctor for treatment advice.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice.

If inhaled: Move person to fresh air. If person is not breathing call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact the poison control Hot Line at 1-800-222-1222 for emergency medical treatment advice.

PRECAUTIONARY STATEMENTS - Hazard to humans and domestic animals.

DANGER: HIGHLY CORROSIVE. Causes irreversible eye damage and skin burns. Harmful if swallowed, irritating to nose and throat. Do not get in eyes, on skin or clothing. Wear protective eye wear (goggles or safety glasses). Wear protective clothing and rubber gloves when handling this product. Avoid breathing dust and fumes. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

PHYSICAL OR CHEMICAL HAZARD - Strong oxidizing agent. Contact with water slowly liberates irritating and hazardous chlorine containing gases. Decomposes at temperatures above 464 F with liberation of harmful gases. When ignited, will burn with evolution of chlorine and equally toxic gases. Never add water to this product. Always add product to large quantities of water. Use clean, dry utensils. **Do not add this product to any dispensing device containing remnants of any other product.** Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible fire and explosion. **Do not allow chemical to come in direct contact with the liner or painted surface of the pool as discoloration can occur. Do not pour into the pool skimmer. Do not mix with other chemicals.**

IN CASE OF FIRE OR SMOKE: Call the fire department. Do not attempt to extinguish the fire without a self contained breathing apparatus. (SCBA). Do not let the fire burn. Isolate the burning material, if possible to the open air or a well ventilated area and flood with large quantities of water. Do not use ABC or other dry chemical extinguishers since there is a potential for a violent reaction.

IN CASE OF CONTAMINATION OR DECOMPOSITION: Do not reseal the container. Follow disposal instructions on label.

DIRECTIONS FOR USE - It is a violation of Federal law to use this product in a manner inconsistent with its labelling.

FOR CONTROL OF BACTERIA AND ALGAE (OUTDOORS) IN SPAS:

1. Before bathing, test water pH, chlorine residual and alkalinity using a

suitable test kit. Adjust chlorine residual to 3 ppm. Reentry into treated swimming pools/spas is prohibited above levels of 3 ppm of chlorine. After bathing superchlorinate to 6 ppm (1 1/2) tablespoon per 450 gallons of water. Maintain pH of water between 7.2 and 7.6 and total alkalinity between 125 and 175 ppm.

2. One tenth oz. (8/10 tsp.) per 450 gal. of water gives 1 ppm of chlorine. To use, broadcast granules into water with jets running.

3. With 4 bathers in a 500 gal. spa, a 2 ppm chlorine residual can drop below the minimum 1 ppm in 15 to 20 minutes. Less water or more bathers will accelerate loss. Test often and keep chlorine residual above 1 ppm.

4. Weekly, superchlorinate water to 5 or 6 ppm (see 2 above). Do not bathe until chlorine drops to 3 ppm. Draining and cleaning of spa is recommended whenever the water becomes difficult to manage or chlorine stabilizer goes over 100 ppm, as measured with a suitable cyanuric acid test kit. Avoid use of products such as body lotions that consume chlorine.

FOR CONTROL OF BACTERIA AND ALGAE IN SWIMMING POOLS:

Scatter directly over surface of pool. Each ounce of product will provide approximately 0.35 ppm of available chlorine in 10,000 gallons of water.

START UP- In a clean pool with no visible algae, bring chlorine residual to 1 to 1.5 ppm as follows:

1. Add 3 oz. of ALL CLEAR 3, Sanitizer 56 for each 10,000 gallons of water.

2. Test for chlorine residual, using a suitable test kit.

3. If chlorine residual is below 1 ppm, continue to add ALL CLEAR 3, Sanitizer 56. Adjust pH to the ideal range of 7.2 to 7.6.

REGULAR CARE - Add 3 oz. of ALL CLEAR 3, Sanitizer 56 for each 10,000 gallons of water every other day, or as needed to maintain your chlorine residual from 1 to 1.5 ppm. Frequency of application will depend on the number of people swimming, water temperature and other conditions.

ADDITIONAL POOL CARE RECOMMENDATIONS - Maintain pH in the ideal range of 7.2 to 7.6. Test for pH at least once a week with a suitable test kit.

SUPERCHLORINATION - Keep your water sparkling clean by adding 12-13 oz. ALL CLEAR 3, Sanitizer 56 per 10,000 gallons of water, at least once every two weeks. Superchlorinate each week during excessive heat, when bathing loads are high, or when there is a "chlorine" like smell to the water. Before swimming, allow the pool to stand until the chlorine residual drops to 3 ppm. Reentry into treated swimming pools/spa is prohibited above levels of 3 ppm of chlorine. If algae appears, treat your pool with ALL CLEAR, Algae Kill following label directions.

STORAGE AND DISPOSAL:

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store in original container, tightly closed away from heat or open flame. Store in a cool, dry, well ventilated place. Keep container off wet floors.

PESTICIDE DISPOSAL: Do not put spilled product, filled or partially filled containers in the trash. Dispose of waste material according to label use directions otherwise call 1-800-CLEANUP for guidance from your local solid waste agency.

CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. Triple rinse container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or mix tank. Fill the container 1/4 full with water and recap. Shake for ten seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. **Offer for recycling if available, or place in trash.**

The container and handling statement for the 300 pound drum will read as follows: **CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. Completely empty the liner by shaking and tapping the sides and bottom to loosen clinging particles. Empty residue into application equipment. Offer for recycling if available, or dispose of liner in a sanitary landfill. If drum is contaminated and cannot be reused dispose of it in the manner required for its liner.**
