DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

For heavy duty cleaning and disinfecting, and fungicidal activity against pathogenic fungi, use 4.5 ounces (133 mL) of **UNITED 62** per gallon (4 litres) of water. For best results, use **UNITED 62** with a cloth or mop and apply to walls, floors, and other hard surfaces. Solution must remain in contact with surface for ten minutes.

At a use dilution of 2 oz. per gallon of water, **UNITED 62** yields 200 ppm of active quaternary.

For extra heavy duty industrial cleaning and disinfecting, use a second application. Do not mix with soap or anionic solutions. **UNITED 62** is non-corrosive in use dilutions on inanimate hard surfaces.

STORAGE AND DISPOSAL:

Do not contaminate water, food, or feed by storage or disposal. **PESTICIDE DISPOSAL:** Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest E.P.A. Regional Office for guidance.

WASTE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Triple rinse (or equivalent), then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill or incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

DESCRIPTION:

UNITED 62 is a heavy duty cleaner and disinfectant designed for general purpose use where heavy duty cleaning and sanitizing is of prime importance. When used as directed, **UNITED 62** will remove most household dirt and grime in a single, simple application. When used for industrial cleaning, follow the use directions shown on the left side panel. Not recommended for *Pseudomonas aeruginosa*.

For sanitization of food processing equipment or food contact items, limit the active quaternary to 200 ppm.
