CONCENTRATE. READ USE DIRECTIONS CAREFULLY BEFORE APPLICATION.

ESPECIALLY COMPOUNDED FOR USE IN INDUSTRIAL RECIRCULATING WATER COOLING TOWERS. ELIMINATES ALGAL GROWTH. ELIMINATES FOUL ODORS.

When UNITED 317 is used as directed, it will aid in controlling and/or preventing the development of unsightly algal slime conditions which are unsightly, produce foul odors, and which are often the cause of equipment breakdown.

UNITED 317 is compatible with virtually any disinfection inhibition additives, but should not be used in the presence of soap or other anionic detergents. UNITED 317 should be used on a regular basis to improve heat transfer surfaces.

**DANGER**  
KEEP OUT OF REACH OF CHILDREN

Caution: Avoid contact with eyes. Do not get into eyes. If contact occurs, flush eyes with water for at least 15 minutes. Wear goggles or face shield and rubber gloves when handling. Wash hands thoroughly with soap and water after use.

**First Aid:**  
In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician if severe and wash contaminated clothing before reuse. If swallowed, drink plenty of water. No antidote available. Drink 1-2 liters of water. Avoid alcohol. Call a physician immediately.

**NOTE TO USER:**  
To obtain maximum effectiveness, only use the use of water. Do not use. Mixtures of water and other liquids should be avoided. When contact occurs, flush with water and discard.

FOR INDUSTRIAL AND INSTITUTIONAL USE ONLY  
NOT INTENDED FOR CONSUMER HOUSEHOLD USE

# SLIMICIDE

## For Use In Industrial Recirculating Water Cooling Towers

**UNITED 317**

**DANGER: KEEP OUT OF REACH OF CHILDREN  
SEE OTHER PRECAUTIONS ON SIDE PANEL.**

**ACTIVE INGREDIENTS:**

n-Alkyl (60% C <sub>16</sub> , 30% C <sub>18</sub> , 5% C <sub>12</sub> , 5% C <sub>14</sub> ) dimethyl benzyl ammonium chlorides	5.0%
n-Alkyl (88% C <sub>12</sub> , 12% C <sub>14</sub> ) dimethyl ethylbenzyl ammonium chlorides	5.0%
<b>INERT INGREDIENTS</b>	90.0%
	<b>100.0%</b>

**DIRECTIONS FOR USE:**  
Apply UNITED 317 at a point in the system where it will be uniformly mixed.  
Begin treatment of the system with a 10% of the sludge after treated greater cleaning systems whose efficiency is already impaired.

**INITIAL DOSE:** 1-2 quills (4-8 litres) of UNITED 317 to 5 000 gallons (20 000 litres) of water. Repeat until control is achieved.

**PERIODIC DOSE:** When algal control is evident, add 1-3 quarts (946 mL - 2 838 mL) of UNITED 317 to 5 000 gallons (20 000 litres) of water every seven days. More frequent applications should be made if visible growth appears.

For best results, rid system of organic debris if possible before application. If soap or anionic detergent is used, rinse system thoroughly before charging with UNITED 317.

Do not be alarmed with the sudden appearance of a considerable amount of organic debris in the system during the first week of operation. This is normal and is a good indication that UNITED 317 has effectively penetrated and dislodged dead organic material which tenaciously adheres to metal and wooden surfaces as living matter. This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water.

**STORAGE AND DISPOSAL**  
Do not contaminate water, food or feed by storage or disposal. Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Container Disposal: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.
