frames, sleeping quarters,
garages, closets, attics, spider
webs, etc. Refer to label for
directions.

Use on
interior window sills,
door frames, etc.
Use on
interior window sills,
door frames, etc.

CHARDON

DIRECTIONS

ROACHES AND WATERBUGS - Use in any good sprayer that will apply a thin fan or pin stream. Apply to all cracks and crevices where roaches might hide. Spray around windows, sills, under sinks, pipes, cupboards, etc. The residual action will provide protection for approximately 3 to 4 weeks on adults and for the young that hatch out in this interim period. Allow approximately 10 to 12 days for good results. Repeat as needed.

ANTS - Apply as for roaches, making sure to treat all cracks in masonry where ants might get back to the soil or dampness. Treat ant trails and areas around door sills and window frames where ants enter the premises. Repeat as often as necessary to maintain effective control.

BROWN DOG TICKS - For household use, spray around cracks and crevices. For animal sleeping quarters, spray cracks and crevices on wall and floors with this solution using about 200 milligrams per square foot. This is to point of runoff. A fan type spray should be used for this application. Repeat as often as necessary to maintain effective control.

CENTIPEDES AND MILIPEDES - Apply same as Roaches.

SPIDERS - Spray the infested area with ROSE 202. Immediate control of the adult can be had when sprayed directly to the web. Control of the infant will be by the residual properties. In inaccessible places, such as crawl space, under homes, etc., a foggy type of application is best. Repeat as often as necessary to maintain effective control.

SILVERFISH - For control of silverfish, treat the sprayer of baseboards and perimeter of the living, bedrooms and storage areas. Repeat as often as necessary to get effective control.

READY TO USE

RESIDUAL INSECTICIDE

CONTAINS "DUAL SYNERGIST"

ROSE 202 is a residual insecticide for indoor spot applications as a surface spray. Use in spot treatments around window sills, door sills, baseboards, under sinks, pipes, cupboards, and in animal sleeping quarters, crawl spaces, and elsewhere listed areas for control of such crawling pests as cockroaches, ants, spiders, silverfish, crickets, carpet beetles, and Brown Dog ticks. Refer to instructions elsewhere on label for specific pest control in given areas.

Active Ingredients

Pyrethrins	0.050
Piperonyl Butoxide, Technical*	0.100
N-Octyl bicycloheptene dicarboximid-	0.067
0,0-diethyl 0-2-isopropyl-4-methyl-6-pyridyl	
phosphorothioate	0.500
Aromatic Petroleum Derivative Solvent	14.00
Aliphatic Petroleum Hydrocarbon	29.777

*Equivalent to 0.08 of (butylcarbonyl-6-propylpiperonyl ether and to 0.02 of related compounds)

USDA Reg. No. 9313-3

CAUTION KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed, avoid contact with skin. Avoid breathing vapors. Wash thoroughly after using. Avoid contact with food, clothing, etc. Do not use near open flame. Do not reuse empty container. Keep out of reach of children. Destroy by perforating and burning in a safe place.
