Silverfish build in corners, especially in buildings. Spiders are common in dark, damp areas. Roaches and bedbugs also thrive in dark, humid environments. Certain species of ants can cause damage to libraries. Mice may eat books, while rats can damage building structures. Even termites can cause significant damage to wood-framed buildings.
Use ROSE 808 in a good sprayer adjusted to deliver a fine mist. Where applicable, ROSE 808 may be used in a thermal type fogger. Regulate dosage in accordance with equipment manufacturers directions for the particular type of applicator employed. Application should be sufficient to fill the enclosure with the fog, mist or vapor. Treat infested areas thoroughly and whenever possible, keep doors and windows closed for 10 minutes after spraying.

**Flying insects:** For control of flies, mosquitoes, gnats, wasps, sand flies, and mosquitoes, direct the spray or fog toward the upper portions of the room and saturate the atmosphere with the mist or fog, using 0.3 ounces to each 1000 cubic feet of space.

**Crawling insects:** To control roaches, silverfish, crickets, and spiders, spray infested areas thoroughly and direct the liquid behind baseboards, moldings, cabinets, shelves, sinks, door and window frames, pipes, toward drains and dark corners, and into cracks, crevices, recesses and similar hiding places.

Against ant infestations, treat shelves, cabinets and storage areas: spray ant runs, crevices, baseboards, thresholds and other places of entry, and treat nests liberally.

In controlling fleas and Brown Dog ticks in buildings, direct the application toward the lower wall portions, baseboards, rugs, carpets and floors of infested areas. Animal quarters, kennels and bedding should also be sprayed.

To control bedbugs effectively, apply liberality to top, ends, sides and bottom of mattresses, spraying thoroughly all tufts, seams and folds. Spray springs and frame, directing the liquid into all cracks and between joints. Treat walls, baseboards, moldings, floors, closets and bedroom furniture, picture frames, with particular attention to protected bedbug hiding and breeding places.

**DIRECTIONS**

For most effective control of clothes moths and carpet beetles, remove infested articles from storage, brush thoroughly and, if possible, air several hours in direct sunlight. Apply spray liberally in empty chests, closets, bureaus and storage, directing the liquid into cracks, joints and crevices. After airing, infested articles may be treated by holding the spray nozzle at least 3 feet away from fabric and applying the liquid tightly to avoid staining, to entire area including the seams. Treat both sides of rugs, carpets, and pads, and all exposed and accessible surfaces of overstuffed furniture. Do not overspray if products are made of rubber or are enclosed, to prevent expansion or swelling. Repeat treatment as needed for susceptible articles not stored in moth-tight containers.

Restaurant and institutional pantries and food storages frequently become infested with various stored food pests including flour beetles, weevils, caddis, grain beetles, meal worms, spider beetles, meal moths, skippers, grain and cheese mites. To avoid exposure, or reinfestation, store food, grain and cereals should be destroyed before treatment. Spray thoroughly all surfaces, shelves, bins, cupboards, cabinets, pantries, lockers and similar storages, with particular attention to cracks, niches, crevices and other hiding places. Cover or remove all foodstuffs prior to treatment. Do not spray directly on foodstuffs. All food processing surfaces should be covered or thoroughly cleaned before using.

**ROSE 808 INSECTICIDE CONTAINS “DUAL SYNERGISTS”**

ROSE 808 is an effective, fast-acting insecticide for the control of roaches, ants and the other listed injurious and annoying insects found in homes, institutions and buildings. It can be used around food, food products and utensils without danger of contamination or poisonous residues, but should not be applied directly to food or foodstuffs. ROSE 808 is highly useful for insect control in institutions, public buildings, hospitals, hotels, clubs, restaurants, stores, markets, theaters and other situations where an effective insecticide with a high degree of safety is required.

**ROSE 808 Insecticide kills by contact:**

- **Roaches:** Ants, Wasps, Bedbugs
- **Silverfish:** Flies, Hornets, Carpet Beetles
- **Crickets:** Mosquitoes, Sand Flies, Flies
- **Spiders:** Gnats, Clothes Moths, Brown Dog Ticks

**ROSE 808 Insecticide kills by contact or exposed or accessible stages of:**

- **Flour Beetles:** Meal Worms, Grain Moths, Spiders, Beetles, Cheese Moths
- **Weevils:** Grain Moths, Spiders, Beetles, Cheese Moths
- **Caddis:** Grain Moths, Spiders, Beetles, Cheese Moths

**Active Ingredients:**

- Pyrethrin 0.375%
- H-N-Octyl bicycloheptene dicarbamimide 1.250%
- Propoxur Butyrate, Technical* 0.750%
- Aliphatic Petroleum Solvent 97.625%

*Equivalent to 0.600% of (butylcarbityl) (4-propylpiperonyl) ether and to 0.15% of related compounds.

**USDA Reg. No. 9313-4**

**CAUTION KEEP OUT OF REACH OF CHILDREN**

Harmful if swallowed, avoid contact with skin. Do not breathe mist, fog, or vapor. Remove Pets, Birds and Fish Bowls from room before spraying. Do not spray near or toward an open flame. Use the product as a space spray in food processing plants only when plant is not in operation. Foods should be removed or covered during treatment. All food processing surfaces should be covered or thoroughly cleaned before using. Do not reuse empty container. Wash thoroughly with water and detergent. Discard in a safe place. Empty drums should be returned to a drum reconditioner.
