

RODETH BLOCKS contain choice ingredients blended with a high-potency anticoagulant chemical into a uniform, ready-to-use bait rodenticide. The special Paraffin used protects the bait in high moisture areas, and may be used in outside areas where meal baits may deteriorate. For use in wet or damp areas.

DIRECTIONS FOR USE: For use in barns, attics, basements, and storm sewers. Attach **RODETH BLOCK** to one end of wire bait station. Attach to bottom stem of wire bait station. Use bait station on wire for baiting.
