

PROINICO™

MIN-A-ROL BLOX 4

With Rabon® Oral Larvicide

To prevent the development of horn flies, face flies, house flies and stable flies in the manure of treated cattle.

ACTIVE INGREDIENTS:	BY WEIGHT
* 2-chloro-1-(2, 4, 5-trichlorophenyl) vinyl dimethyl phosphate.....	0.473%
INERT INGREDIENTS:**	99.527%
TOTAL	100.00%

* Each pound contains 2.14 g. RABON®
** Refers only to ingredients which are not larvicidal.

FEED INGREDIENTS:

Cane molasses, soybean mill feed, dicalcium phosphate, salt, calcium carbonate, dried molasses, manganous oxide, iron sulfate, magnesium oxide, zinc oxide, copper oxide, cobalt carbonate, Ethylenediamine dihydriodide, sodium selenite, D-Activated animal sterol (source of Vitamin D₃), Vitamin A acetate.

GUARANTEED ANALYSIS:

Calcium (Ca.), maximum	7.20%
Calcium (Ca.), minimum	6.00%
Phosphorus (P), minimum	4.00%
Salt (NaCl), maximum	19.20%
Salt (NaCl), minimum	16.00%
Total Sugars (as invert), minimum	17.00%
Vitamin A, minimum 60,000 U.S.P. Units Per Lb.	
Vitamin D ₃ , minimum 5,000 U.S.P. Units Per Lb.	

DIRECTIONS FOR USE: GENERAL CLASSIFICATION

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Provide one block per five head of cattle. Add an additional block when each block has been one half consumed. Feed at a daily rate of .07 grams of larvicide in 0.5 ounce of block per 100 pounds of body weight. Example: 5 ozs (approximately 1/2 pound) of block for a 1000 pound animal daily. This will supply the recommended average intake of 70 mg RABON ORAL LARVICIDE* per hundred pounds of body weight. Do not feed salt or mineral supplements of any kind containing salt. Place blocks near water and feeding areas. Protect from rain. If consumption of Promico MIN-A-Rol 4 is above the recommended level, decrease the number of feeding stations and/or raise the block per head ratio.

Start feeding Promico MIN-A-ROL 4 early in the spring before flies begin to appear and continue feeding throughout the summer and into the fall. Promico MIN-A-ROL 4 may be fed up to slaughter and to lactating dairy cows.

Promico MIN-A-ROL 4 prevents the development of horn flies, face flies, house flies and stable flies in the manure of treated cattle but is not effective against existing adult flies. Supplemental fly control measures may be needed in and around cattle lots and

buildings to control adult house flies and stable flies which can breed not only in cattle manure, but in other decaying vegetable matter or silage on the premises. Because face flies migrate, work with your neighbors to more effectively control the adult face fly population.

In order to achieve optimum fly control, the Promico MIN-A-ROL 4 should be used in conjunction with other good management and sanitation practices.

KEEP OUT OF REACH OF CHILDREN CAUTION

See below for additional precautionary, storage and disposal statements.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS

Harmful if swallowed. Avoid contact with skin and eyes. Avoid breathing dust. Wash thoroughly with soap and water after handling and before eating or smoking. If in eyes, wash with plenty of water. If irritation persists, see a physician.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Keep out of lakes, streams or ponds. Do not contaminate water by cleaning of equipment or disposal of wastes.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE DISPOSAL

Pesticide that cannot be used according to label instructions must be disposed of according to applicable Federal, State or Local procedures.

CONTAINER DISPOSAL

Completely empty bag by shaking and tapping sides and bottom to loosen clinging particles. Empty residue into application equipment. Then dispose of bags in a sanitary landfill or by incineration if allowed by State and Local authorities.
