

DIRECTIONS FOR USE

Space spray to kill flies, mosquitoes, gnats and flying moths: Shake container gently to be sure contents are uniformly mixed. Pour in sprayer. Close doors and windows and turn off ventilating equipment. Mist all parts of the room or area at a dosage of one fluid ounce of dilute spray per 1000 cubic feet of space. Repeat as needed.

Contact spray to kill roaches, waterbugs, crickets and exposed forms of crawling grain pests: Shake container gently as above. Apply as a coarse spray to all cracks and crevices in woodwork, beneath sinks, dark places behind pipes and in all places where these insects rest, contacting as many insects as possible with the spray. Repeat applications as often as necessary to gain control. For grain weevils, cadelles, grain moths, flour beetles and grain mites apply as a coarse spray to all infested surfaces, insect hiding places and insect runways at the rate of one gallon of spray on 750 square feet of area. Repeat when necessary.

CAUTION

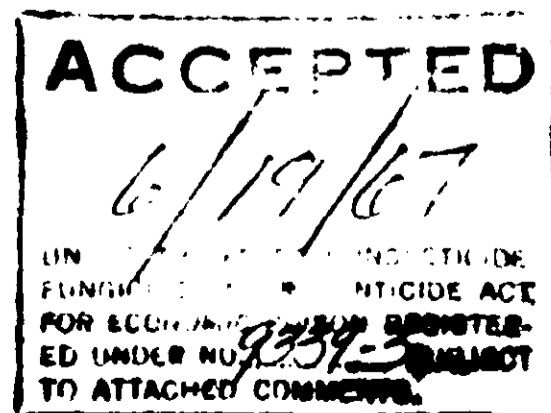

Cover or remove exposed food and feedstuffs during spraying. After spraying in meat packing plants wash with potable water all equipment, benches, shelving, etc., where exposed food will be handled. Keep containers closed. Remove birds and fishbowls from room being sprayed.

ACTIVE INGREDIENTS

Pyrethrin ¹	.10%
**Piperonyl butoxide, technical	.20%
↓N-octyl bicycloheptene dicarboximide	.33%
Petroleum distillate	.48%
<u>INERT INGREDIENTS</u>	<u>98.89%</u>
Total	100.00%

** Consists of 0.16% (butylcarbityl) (6-propylpiperonyl) ether and 0.04% related compounds.

FLEXBAR

PYRETHRIN FOGGING COMPOUND

DIRECTIONS FOR USE

General Information

Flexabar Fogging Compound kills accessible stages of Flour Beetles, Cereal Moths, Flies, Mosquitoes, Weevils, Roaches that infest residential and industrial buildings. *XII & microns VIII microns*

The Fogging Compound is designed primarily to be used to control Flies, Mosquitoes, Cereal Moths. For most effective results, use in a misting or fogging device capable of producing very fine spray particles, ranging in size from 10 to 20 microns. If possible, close windows and doors before application to confine spray vapors.

Directions for Use

To control Flies, Mosquitoes, Cereal Moths use Fogging Compounds at the rate of 1/2 to 2 ounces per 1000 cubic feet. Regulate fogging machine to deliver insecticide in a fine mist spray (10 to 20 microns-particle size) or fog. Keep fogged area tightly closed for at least 15 minutes to insure best results. To control crawling insects; Silver Fish, Earwigs, Grain Beetles, in warehouses, industrial plants and storage areas, use a coarser spray (20 to 40 microns-particle size). To insure the killing of these crawling species, it is desirable to contact them directly with this coarser type spray by treating cracks, crevices and infested areas. Repeat application when necessary.

After spraying in meat packing plants, bakeries and other food processing plants, wash with Potable water all equipment, benches, shelving, etc., where exposed food will be handled. Do not apply where food processing is underway. *III. 11 200 6000*

FLEXABAR

PYRETHRIN FOGGING COMPOUND

Active Ingredients - 100%

Consisting of - Petroleum Distillates	97.5%
N-octyl-bicycloheptene dicarboximide	1.3%
Technical Pyperonyl Butoxide*	0.8%
Pyrethrins	<u>0.4%</u>

100%

*Consists of (Butylcarbityl) (6-Propylpiperonyl) Ether and other related compounds.

A highly concentrated ready to use Pyrethrin insecticide to be used in fogging devices for the control of flies, mosquitoes, cereal moth, silver fish, earwigs, grain beetles in industrial and residential buildings.

CAUTION

HARMFUL IF SWALLOWED. KEEP OUT OF REACH OF CHILDREN.
See side panel for additional cautions.
