**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

DANGER: Corrosive, may cause severe skin irritation or chemical burns to broken skin. Causes eye damage. Do not get in eyes, on skin or on clothing. Wear safety glasses, goggles or face shield and rubber gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until strong odors have dissipated.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this active ingredient into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with gross filth such as feces, urine, etc., or with ammonia, acids detergents or other chemicals may release hazardous gases irritating to eyes, lungs and mucous membranes. This product is a strong bleaching agent. Do not spill on clothing, carpet or other fabric. Store containers upright and secure in transit to prevent upset. Caps can loosen in storage. Tighten before moving. Closures also are vented to release pressure build-up, and can leak in transit. If accidentally spilled, rinse immediately with plenty of water. Do not transfer contents to any metal container for storage.

See side panels for additional precautionary statements.

DIRECTIONS FOR USE:

It's a violation of federal law to use this product in a manner inconsistent with its labeling.

DIRECTIONS FOR SANITIZING FOOD PROCESSING OR DAIRY EQUIPMENT:

All surfaces to be sanitized should be properly cleaned with potable water before applying sanitizer.

The recommended use solution for sanitizing is to be applied to food contact surfaces, such as, utensils, fixtures, and equipment by flooding, spraying, or immersing, to thoroughly wet the surfaces.

TO SANITIZE NON-POROUS FOOD CONTACT SURFACES,

such as, glass, cans, utensils, equipment, tanks and other metallic or non-porous surfaces, use a 200 PPM (part per million) sanitizing solution. (½ ounce per 5 quarts of water).

Non-porous food contact surfaces sanitized with a 200 PPM available chlorine solution should be allowed to drain and air dry without a potable water rinse after treatment.

TO SANITIZE POROUS FOOD CONTACT SURFACES,

such as, wood floors, wood platforms, porous table tops, tile, etc., use a 800 PPM (parts per million) sanitizer solution. (2 ounces per 5 quarts).

Porous food contact surfaces sanitized with 800 PPM available chlorine solution must be rinsed with potable water after treatment.

SANITIZING SOLUTIONS

When "Sur-Clean 64," sodium hypochlorite solution, is added to potable water:

½ ounce in 5 quarts water = 200 PPM

2 ounces in 5 quarts water = 800 PPM

It is recommended that a fresh sanitizing solution be prepared at least daily or more often, if the solution becomes diluted or soiled.

NOTE: This product degrades with age. Use a chlorine test kit and increase or decrease dosage, as necessary, to obtain the required level of available chlorine.

STORAGE AND DISPOSAL: Store this product in a cool dry area, away from direct sunlight and heat to avoid deterioration. In case of spill, flood areas with large quantities of water. Product or rinsates that cannot be used should be diluted with water before disposal in a sanitary sewer. Do not reuse empty container but place in trash collection. If a deposit container, return to supplier. Do not contaminate food or feed by storage, disposal or cleaning of equipment.
