**GENERAL INFORMATION**

A non-selective vegetation killer, to be applied as a spray, on non-cropland areas where bare ground is desired.

The degree of weed control and duration of effect will vary with the amount applied, soil type, rain fall, and other conditions.

**DIRECTIONS**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For containers of less than 5 gallons, persons engaged in open pouring of this product must also wear coveralls or a chemical-resistant apron. For containers of 5 gallons or more, "A mechanical system (probe and pump) must be used for transferring the contents of this container. If the contents of a non-refillable pesticide container are emptied, the probe must be rinsed before removal." "Do not allow people (other than applicator) or pets on treatment area during application. Do not enter treatment area during application. Do not enter treatment areas until spray has dried or dust has settled." The maximum number of broadcast applications per treatment site is 2 per year. The maximum application rate for this product is 2 pounds per application per site. When using this product, wear long-sleeved shirt, long pants, socks, shoes, chemical-resistant gloves and eye protection. It is recommended that safety glasses include front, brow and temple protection. After using this product, rinse gloves before removing, remove clothing and launder separately before reuse, and promptly and thoroughly wash hands and exposed skin with soap and water. Remove saturated clothing as soon as possible and shower. Apply any time of the year (except where ground is frozen). Best results are obtained after predominate species are well established in late spring or early summer. Before treatment, calibrate equipment to assure uniform coverage of the area to be treated.

**APPLICATION**

Power sprayers, compressed air hand sprayers, or ordinary sprinker cans may be used. General weed control to control most weeds for an extended period of time on non-cropland areas such as parking lots, tennis courts, loading ramps, railroad sidings, storage yards around buildings and industrial plants: Apply 2 to 5 gallons in 25 gallons fuel oil or kerosene per 1000 square feet of treated area (1 acre equals 43,000 square feet). To control annual weeds and grasses such as foxtail, ryegrass, broomsedge, lambsquarters, and turkey mullein: Apply 1 to 2 gallons in 25 gallons of fuel oil or kerosene per 1000 square feet. To control perennial weeds and grasses such as smooth brome, Canada bluegrass, purple top, quack-grass, broomsedge, aster, dandelion, dog fennel, goldenvod, plantain, and wild carrot: Apply 2 to 4 gallons in 25 gallons fuel oil or kerosene per 1000 square feet. For other hard to kill perennial weeds and grasses such as johnson grass, ashgrass, bouncing bet, bracken fern, and horsetail: Apply 3 to 5 gallons in 25 gallons fuel oil or kerosene per 1000 square feet.

If Swallowed: Do not induce vomiting. Contact a physician or poison control center immediately. Avoid contact with skin, eyes, or clothing. In case of contact with skin or eyes, wash thoroughly and repeatedly with water and call a physician.

### ENVIRONMENTAL HAZARDS

Do not apply to areas underlaid by roots of desirable trees and shrubs. Do not apply liquid directly to or otherwise permit it to come into contact with susceptible plants such as vegetables, flowers, fruit trees, ornamentals, cotton, grapes, or other desirable plants. Coarse sprays are less likely to drift. Vapors from this product may injure susceptible plants in the immediate vicinity. Do not apply when weather conditions favor drift from areas treated.

This product is toxic to aquatic invertebrates, and runoff may adversely affect aquatic invertebrates and non-target plants. Do not apply directly to water or wetlands (swamps, bogs, marshes, and potholes). Do not contaminate water when disposing of equipment wash waters.

This product can reach ground water as a result of mixing and loading. To minimize ground water contamination from spills during mixing, loading and cleaning of equipment, take the following steps:  
 Mixing and loading: When mixing, loading or applying this product, wear chemical resistant gloves. Wash non-disposable gloves thoroughly with soap and water before removing.

The mixing and loading of spray mixtures into the spray equipment must be carried out on an impervious pad (e.g. concrete slab, plastic sheeting) large enough to catch any spilled material. If spills occur, contain the spill by using an absorbent material (e.g., sand, earth or synthetic absorbent). Dispose of the contaminated absorbent material by placing in a plastic bag and following disposal instructions on this label.

Triple rinse empty containers and add the rinsate to the mixing tank.  
 Cleaning of equipment: When cleaning equipment, do not pour the wash water on the ground. Spray or drain over a large area away from wells and other water sources.

### STORAGE AND DISPOSAL INSTRUCTIONS

Do not contaminate water, food, or feed by storage or disposal. Store in a cool, dry place away from heat or open flame. Do not store near fertilizers, seeds, insecticides, or fungicides.

### PESTICIDE DISPOSAL

"Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law and may contaminate ground water. If these wastes cannot be disposed of by use according to label instructions, contact your state pesticide or environmental control agency, or the hazardous waste representative at the nearest EPA regional office for guidance."

### CONTAINER DISPOSAL

Triple rinse (or equivalent). Then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

### PHYSICAL OR CHEMICAL HAZARDS

Combustible mixture. Do not store near heat or open flame. Do not refill this container. Do not cut container with torch as explosion may result.
