1950 Vaughan Road
Kennesaw, GA 30144

Attention: Ransom V. Hinton, Director

Subject: AMA 35D-P
EPA Registration No. 9386-13
Notification Dated September 5, 2006

This will acknowledge receipt of your notification for the following additional alternate brand name, submitted under the provisions of FIFRA Section 3(c)(9). Based on a review of the submitted material, the following comments apply.

ADDITIONAL BRAND NAME

AMA-398

The Notification is in compliance with PR Notice 98-10 and is acceptable. This information has been added to your file.

If you have any questions concerning this letter, please contact Martha Terry at (703) 308-6217.

Sincerely

A handwritten signature in cursive script that reads 'Martha Terry' followed by a date '10/4/06'.

Re: AMA-398 – Reg. No. 9386-13
Notification for additional brand name

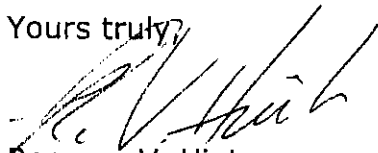

Dear Mr. Swindell:

This package is to provide Notification to the Agency of an additional brand name under which we propose to market this product. Along with the Application form, labeling is included showing that selected sites are included on this container label. Otherwise, only the brand name has been changed.

This registration action is not subject to fees under PRIA.

If you need additional information, please call me at the following toll-free number: (800)-347-1542.

Yours truly,

Ransom V. Hinton
Director HS&E

DIRECTIONS FOR USE:

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

FOR USE AS AN ANTIMICROBIAL IN OILFIELD OPERATIONS

FOR OILFIELD OPERATIONS USE: OILFIELD DRILLING MUDS AND WORKOVER OR COMPLETION FLUIDS: FOR CONTROL OF SLIME-FORMING

AND/OR SPOILAGE BACTERIA: Determine the total volume of the circulating system. Calculate the number of pounds of AMA[®]-398 needed to produce a concentration of 500 ppm (0.18 lb/bbl) of AMA[®]-398 in the drilling mud circulating system. For example, 175 pounds of AMA[®]-398 per 1000 barrels of drilling fluid will produce the proper concentration. For best results, add AMA[®]-398 in a thin stream to the mud pit while drilling fluid circulates. As the total volume increases due to greater well depth, add additional AMA[®]-398 to maintain the proper concentration. Because of the wide variation in drilling mud composition and bacterial contamination, greater or lesser amounts of the AMA[®]-398 may be prescribed.

OILFIELD WATER TREATMENT AND WATER FLOODS: FOR CONTROL OF

SLIME-FORMING BACTERIA: Calculate the total volume of water to be treated. Using this volume, calculate the number of pounds of AMA[®]-398 needed to produce a concentration of approximately 200 ppm AMA[®]-398. For example, 1.67 pounds of AMA[®]-398 per 1000 gallons of total volume will produce this dilution. 150 ppm AMA[®]-398, added each week is recommended to maintain bacterial control. This may be accomplished by adding 1.25 pounds of AMA[®]-398 to each 1,000 gallons of total volume. Because of the wide variation in waters found in the oil fields, greater or lesser amounts of AMA[®]-398 may be required in a particular location.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Warning. May be fatal if swallowed. Harmful if inhaled or absorbed through skin. Avoid breathing dust and contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reusing.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not apply (or use) in estuarine oil fields where drilling fluids (muds) are discharged in the surface water. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal of this product.

STORAGE: Protect from temperatures in excess of 140°F. Keep container closed when not in use. If contents are spilled or leaked due to container damage, collect and dispose of in accordance with local, state and federal disposal regulations.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label directions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Fiber Drums with Liners: Completely empty liner by shaking and tapping sides and bottom to loosen clinging particles. Empty residue into application equipment. Then dispose of liner in a sanitary landfill or by incineration if allowed by state and local authorities. If drum is contaminated and cannot be reused, dispose of in the same manner.
