AMA-5 (5% MBT)

# **DIRECTIONS FOR USE**

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTANT WITH ITS LABELING.

PAPER MILLS: AMA-5 is added to the white water system or through the stock furnace at a normal rate of 0.2-1.1 lbs/ton of paper. The exact dosage will depend upon operating conditions and the extent of microbiological contamination of the system. If slime build up is heavy, addition is best made in the periodic stock dosages such that a total required dosage is added to within a 2-4 hour period. Otherwise, the biocide may be metered continuously into the system at the recommended dosage.

SOLUTIONS & EMULSIONS: For the preservaion of solutions, emulsions, adhesives and other liquid products, the addition of 200 ppm of AMA-5 based on total weight of the product is effective. Do not use in products of this type that are intended for the manufacture of food packaging materials.

SECONDARY OIL RECOVERY: For control of sulfate reducing bacteria and other microorganisms in water used for secondary oil recovery or subsurface injection, 2-16 ounces weight of AMA-5 per 1000 gallons of water (20-124 ppm of product) as a slug treatment once or twice per day is effective.

COOLING WATER SYSTEMS: AMA-5 controls bacteria, yeasts, fungi and algae in cooling water systems. The product is best added to recirculating water cooling towers as a slug treatment at a dosage of 3.32 to 16.5 ounces weight per 1000 gallons of water (25-124 parts of product per million parts of water) one to three times per week depending upon the severity of the problem. 12 to 26 ounces weight per 1000 gallons of water slug fed daily may be necessary in systems with heavy microbiological contamination. If such contamination is present, avoid clogging of screens.
