U.S. ENVIRONMENTAL PROTECTION AGENCY
Office of Pesticide Programs
Registration Division (H7505C)
401

"M" St., S.W.

Washington, D.C. 20460

EPA Reg. Number:

9386-37

Date of Issuance:

MAY 31 2001

Term of Issuance:

CONDITIONAL

Name of Pesticide Product:

"AMA-40"

NOTICE OF PESTICIDE:

- Registration
- Re-registration

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Vinings Industries, Inc.
245 TownPark Drive, Suite 200
Kennesaw, GA 30144

Attention: Mr. Ransom Hinton

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/re-registered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for re-registration of your product under FIFRA section 4.
2. Add the phrase EPA Registration Number "EPA Reg. No. 9386-37".

Signature of Approving Official:

Marshall Swindell
Acting Product Manager 33
Regulatory Management Branch 1
Antimicrobial Division (7510C)

Date:

MAY 31 2001

3. Change the "Statement of Practical Treatment" to incorporate the statements listed in PR Notice 2001-1 for the eye, skin/clothing, oral, and inhalation exposures.

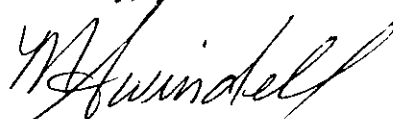

4. Submit three copies of a revised final printed label.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the accepted label is enclosed for your records.

If you have any questions concerning this letter, please contact myself at 703-308-6341, or Tony Kish at (703) 308-9443.

Sincerely,

Marshall Swindell
Acting Product Manager 33
Regulatory Management Branch 1
Antimicrobial Division (7510C)

Enclosure

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

MICROBICIDE FOR USE IN INDUSTRIAL RECIRCULATING WATER COOLING TOWERS AND EVAPORATIVE CONDENSERS:

For control of bacteria, algae and fungi, add AMA[®]-40 to the basin, distribution box or other point where complete mixing is assured. Dosages for industrial recirculating water cooling towers or evaporative condensers will depend on the condition of the system prior to treatment initiation. Systems which are heavily contaminated should be cleaned first.

INTERMITTENT OR SLUG METHOD:

Initial Dose: When the system is noticeably fouled, apply 13.6 fluid ounces of AMA[®]-40 per each 1,000 gallons of water in the system (125 ppm). This dose may be repeated once, twice or three times weekly or as required to control the growth of slime-forming organisms.

Subsequent Dose: When microbial control is evident, add 2.2 to 4.4 fluid ounces of AMA[®]-40 per 1,000 gallons of water in the system (20-40 ppm) every three days or as needed to maintain control.

MICROBICIDE FOR USE IN PAPERMILLS: For control of bacterial and fungal slime, add AMA[®]-40 by suitable chemical metering pumps as early as possible in the system at points such as the proportioner, hydropulper, machine chest or broke system or other points where complete mixing is assured.

Dosage: Apply 0.25 to 1.0 pounds (3.3 to 13 fluid ounces) of AMA[®]-40 per ton (dry basis) of finished paper produced for two hours every eight hour as a slug dose. Repeat daily as needed, depending upon the type of stock, complexity of the system, quality of the raw water and type and degree of contamination. Badly fouled systems should be cleaned before initial treatment.

MICROBICIDE FOR USE IN BEET SUGAR MILLS: AMA[®]-40 should be fed directly into the raw juice during sugar extraction of beets to keep equipment free of bacterial slime deposits. It is to be used at the rate of 15 to 30 ppm of product per million parts of raw beets sliced, and fed continuously into the pulp press water tank with a metering pump. The maximum rate to be fed is 30 ppm. Refer to Table 1 for the proper dosage in milliliters and ounces of AMA[®]-40 to be used per minute.

TABLE I

Rate of Feed of AMA[®]-40

SHORT TONS OF RAW BEETS SLICED PER DAY	15 ppm		30 ppm	
	ML/MIN	OZ/MIN	ML/MIN	OZ/MIN
1,000	8.0	0.3	16.1	0.5
2,000	16.1	0.5	32.2	1.1
3,000	24.1	0.8	48.3	1.6
4,000	32.2	1.1	64.4	2.2
5,000	40.2	1.4	80.5	2.7
6,000	48.3	1.6	96.6	3.3
7,000	56.3	1.9	112.6	3.8
8,000	64.4	2.2	128.7	4.4
9,000	72.4	2.4	144.8	4.9
10,000	80.5	2.7	160.9	5.4

AMA[®]-40

MICROBICIDE FOR INDUSTRIAL USE

Active Ingredient:
Sodium Dimethyldithiocarbamate..... 40%
Inert Ingredients:..... 60%
TOTAL..... 100%

KEEP OUT OF REACH OF CHILDREN

WARNING

STATEMENT OF PRACTICAL TREATMENT

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of egg whites, gelatin solution or if these are not available, drink a large quantity of water. Call a physician immediately.

See side panel for additional precautionary statements.
