3. Submit three copies of the final printed label prior to releasing this product for sale.

The Confidential Statement of Formula dated January 14th, 2008, is acceptable.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely,

Marshall Swindell

Product Manager 33 Regulatory Branch I Antimicrobials Division (7510P)

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

AMA[®]-480WB is an effective preservative in most aqueous compositions. The concentration required to give protection depends on several factors. These include the susceptibility of the system to microbiological degradation, the extent to which micro-organisms can gain access, the species involved, pH, temperature, and length of time for which protection is required. For protection against bacterial attack, a concentration within the range 0.02-0.25% AMA[®]-480WB is almost invariably sufficient. The control of mold growth, particularly on paste products of high solids content, may occasionally require demand dosages above 0.25%. In dilute fluid systems, spoilage is usually controlled with dosages not greater that 0.09%. Do not use at concentration greater than 0.5%.

| Type of Material To Be Protected | Lbs AMA®-480WB To Use Per 1000 Lb Of Material | | |
|--|---|--|--|
| Type of Material 10 de Frotecteu | To Be Protected | | |
| Latices, such as: polymer latices based on acrylate, | 0.5 to 1.5 lb (0.05 - 0.15 %) | | |
| butadiene, PVA or styrene; synthetic rubber/latex | | | |
| Oil-in-water emulsions such as textile spin-finish | 0.5 to1.8 lb (0.05 - 0.18 %) | | |
| solutions, cutting/rolling oils, soluble oils (metal and | | | |
| engineering industries), and photographic emulsions. | | | |

rosin dispersions, starch and casein based products.

Pulp & paper mill system slime control--The preferred method of addition is by shock dosing because this ensures that a high concentration of $AMA^{\textcircled{B}}$ -480WB is present in the system for several hours. If a slime control agent is added by continuous methods over periods of several hours, its concentration in the system at all times is low. This can lead to the development of resistant organisms, which is less likely to occur when the shock dosing method is used.

It is not possible to give precise recommendations as to the quantity of AMA®-480WB to add to control slime formation, because the magnitude of the problem varies greatly from mill to mill, depending on the furnish employed, the cleanliness of the mill system, and the additional nutrients (for example, starch) that may be added to the stock. The following quantities of AMA[®]-480WB are suggested for trial: Shock dosing: If this preferred method is adopted, add 2.5 to 9 ounces of AMA[®]-480WB for each ton of paper produced per day as a single shock dose, the actual quantity to be used depending on the severity of the slime problem. This addition may be made to any part of the stock preparation or backwater system Alternatively, the addition may be made to those parts of the system where it is known that slime deposition accumulate. Continuous addition: If this method is adopted, add AMA[®]-480WB continuously for either accumulate. Continuous addition is the single period of 8 hours during every 24 hours or for two separate periods of 4 nours during every 24 hours or for two separate periods of 4 nours during every 24 hours or for two separate periods of 4 nours during every 24 hours or for two separate periods of 4 nours during every 24 hours or for two separate periods of 4 nours during every 24 hours or for two separate periods of 4 nours during every 24 hours or for two separate periods of 4 nours during every 24 hours or for two separate periods of 4 nours during every 24 hours or for two separate periods of 4 nours during every 24 hours or for two separate periods of 4 nours during every 24 hours or for two separate periods of 4 nours during every 24 hours or for two separate periods of 4 nours during every 24 hours or for two separate periods of 4 nours during every 24 hours or for two separate periods of 4 nours during every 24 hours of 7 to 8.5 ounces for each 40 hours of paper produced during the dosing period. Asheren Insections

DANGER

Corrosive: Causes skin burns and irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or at Sorbed through skin. Do not get in eyes, on skin, or on clothing. Do not breathe vapor or spray mist. Wear goggles of face shield, chemical resistant gloves, long pants and long sleeved shirt. Wear a mask or pesticide respirator approved by the National Institute for Occupational Safety and Health. Wash thoroughly with soap and water after handling and befor eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA. Do not contaminate water by cleaning of equipment or disposal of wastes. Do not apply in marine or estuarine oil fields.

STORAGE AND DISPOSAL

PROHIBITIONS: Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited. PESTICIDE STORAGE: Protect from frost. If frozen, allow to thaw and stir well before use.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

WARRANTY AND WARRANTY DISCLAIMERS:

Kemira Chemicals, Inc. warrants that this product conforms to the chemical description on the label and that it is reasonably fit for the purposes stated on the label when used in accordance with KEMIRA's directions under normal conditions of use. This warranty does not extend to the use of this product contrary to label instructions, or under abnormal use conditions, or under conditions not reasonably foreseeable to KEMIRA, and the buyer assumes the risk of any such use. KEMIRA DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY.

IN NO EVENT SHALL KEMIRA BE LIABLE FOR ANY SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, INCLUDING LOST PROFITS, ON ANY THEORY WHATSOEVER, INCLUDING NEGLIGENCE, and KEMIRA's sole liability and Buyer's and User's exclusive remedy shall be limited to the refund of the purchase price. Statements concerning the use of products or the formulations described therein are not to be construed as recommending the infringement of any patent and no liability for infringement arising out of any such use is assumed by KEMIRA.
