# UNITED STATES ENVIRONMENTAL PROTECTION AGENCY WASHINGTON, D.C. 20460

OCT 2 1 2009

EPA United States Environmental Protection Office of Pesticide Programs

Kemira Chemicals, Inc. 1950 Vaughn Road Kennesaw, GA 30144

Attention: Dale A. Bauer

# Subject: AMA-80S

EPA Registration No. 9386-47 Notification Dated September 30, 2009

This will acknowledge receipt of your notification of the following alternate Brand name, submitted under the provisions of FIFRA Section 3(c)(9). Based on a review of the submitted material, the following comments apply.

### Alternate Brand Name

"AMA-180S"

The Notification is in compliance with PR Notice 98-10 and is acceptable. This information has been added to your file.

If you have any questions concerning this letter, please contact Martha Terry at (703) 308-6217.

Sincerely

Marshall Swindell Product Manager (33) Regulatory Management Branch 1 Antimcrobials Division (7510P)

Document Processing Desk (NOTIF) Office of Pesticide Programs (7504P) U.S. Environmental Protection Agency One Potomac Yard 2777 South Crystal Drive Arlington, VA 22202

Attention: Marshall Swindell (PM 33)

Subject: AMA-80S, Reg. No. 9386-47 Notification under PR 98-10 for Alternate Brand Name (AMA-180S)

Dear Marshall:

Enclosed please find a notification consistent with PR 98-10 for product labeling notifications under Section IIA, to add an alternate brand name for this product.

Enclosed with this application please find the following:

1. EPA Form 8570-1

2. One copy of the label with the revisions highlighted

Please let me know if there are any questions or if anything else is needed.

Sincerely,

Dale a Bauer

#### **DIRECTIONS FOR USE**

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

**AMA**. 1805 is an effective preservative in most aqueous compositions. The concentration required to give protection depends on several factors. These include the susceptibility of the system to microbiological degradation, the extent to which micro-organisms can gain access, the species involved, pH, temperature, and length of time for which protection is required. For protection against bacterial attack, a concentration within the range 0.02-0.25% AMA. 1805 is almost invariably sufficient. In dilute fluid systems, spoilage is usually controlled with dosages not greater that 0.09%. Control of mold growth, particularly on paste products of high solids content, may occasionally require demand dosages above 0.25%. Do not use at concentration greater than 0.5%. Trials at different concentrations are recommended. Typical applications, and the suggested range of concentrations on which trials can be based, are:
