1. The first part of the report deals with the general situation of the country and the progress of the war. It is a very interesting and informative account of the events of the past few years.

-D.C.

2. The second part of the report deals with the economic situation of the country. It is a very detailed and accurate account of the economic conditions of the country.

3. The third part of the report deals with the social situation of the country. It is a very thorough and complete account of the social conditions of the country.

Sunniland Flower Power
Copy for left panel

Sunniland Flower Power Rose & Ornamental Care is a complete fertilizer containing all necessary essential plant food elements combined with a systemic insecticide to control sucking insects. This insecticide is absorbed through the root of the plants along with the food and protects the plant from within. It can not be washed off and will protect new shoots as well as underside of leaves.

DIRECTIONS

When to apply:

Start regular program of fertilizing as needed and continue at six week intervals. When used as directed, this material will furnish adequate plant food and protect plants from sucking insects for six weeks or longer.

For Fungus or Black Spot on Roses: Use Sunniland Fore or Sunniland Coppercide.

How to Use:

On established roses, spread 1/3 cup (2 ozs) evenly around the base of each plant and work into top 1 to 2 inches of soil. Water thoroughly. Avoid contact with hands.

When planting new roses, place 1/4 cup in hole and mix with prepared soil. Apply 1/4 cup around plant when hole is filled, working into top 2 inches. Water Well. Additional fertilizer will not be needed for six weeks.

For Annuals (petunias, snapdragons, calendulas, marigolds, zinnias etc), bulbs, flower beds. Apply 2-3 lb. per each 100 sq. ft. of bed area. Work into top 1 to 2 inches of soil. Plant seeds or set plants and water thoroughly. For individual plants, use 1 teaspoonful around each plant and water well.

On Potted Plants: Use one level teaspoonful per six inch pot and scratch into top soil. Water well after application.

On Ornamental Shrubs: Apply 2/3 cupful (4 oz.) for each foot of shrub height. Distribute the required amount evenly from the base of the plant to the drip line all around the plant. Work into the top 1 to 2 inches of soil and water thoroughly.

5 rounded tablespoons equal 1/3 cup
