

ALGICIDE 101

For control of algae and organic growths in cooling water systems. Add one pellet for each 50 gallons of water in the system. For extra heavy growths, double or quadruple dosage. Repeat as often as necessary to control the organic growths. Care should be used as heavy foaming may result.

Active Ingredients:

Sodium Pentachlorophenate.....75%

Sodium Salts of Other Chlorophenols.....13%

Inert Ingredients.....12%

CAUTION: Do not allow water that contains the algicide to come in contact with grass or plants. Do not use for treating drinking water supply.

Keep out of reach of children. (6 ft)

WARNING: Do not get in eyes, on skin, or on clothing. Harmful if swallowed. Causes skin irritation. Do not breathe dust. Wash thoroughly after using. Do not take internally. In case of accidental swallowing, induce vomiting by administering warm salt water (1 tablespoon per glass), or other emetics. Call a physician.

ALGICIDE 101DESCRIPTION

Algaecide 101 is a pentachlorophenolate base algaecide briquitted into 1 oz. pellets.

PACKAGING

Available in 20, 50, and 100 pounds net fibre drums.

USE

Algaecide 101 is used to control algae and slime growths in recirculating cooling water systems. It is particularly effective as a shock treatment and when used alternately with Chlor-Chloists, Inc., Algicide 104 or chlorination.

APPLICATION

Algaecide 101 pellets are added to the sump or distribution trough of the cooling system.

1. Add 1 pellet for each 40 gallons of water in system.
2. Allow system to stand-off for 1-2 hours after addition.
3. Frequency of treatment may range from daily to monthly, depending upon the severity of the algae problem and other algaecides used.
4. Single or quadruple dosages may be used to control severe growths but this may cause foaming.

ANALYSIS

Algaecide 101 will give 150 ppm of product. Control testing is recommended.

PRECAUTIONS

Algaecide 101 is a strong irritant. Avoid contact with skin and eyes.

STORAGE

Algaecide 101 should be stored in a cool, dry place where no children or pets can reach it.

Algaecide 101 should be used to supplement chlorination or Algicide 104.

Algaecide 101 is not a disinfectant and should not be used as one.
