

Product Name: [Faint text]

Net Content: 1 lb.

S I C I

SPECIAL FORMULA ALKALI DISINFECTANT

ACTIVE INGREDIENT.....1.00%
Benzyl Dimethyl Tetradecyl Ammonium Chloride Dihydrate

Phenol Coefficients

Salmonella typhosa.....700
Staphylococcus aureus.....700

U.S.D.A. Registration Number

ACCEPTED
4429-1
MAY 23 1968
U.S. DEPARTMENT OF AGRICULTURE
GENERAL INSECTICIDE
FUNGICIDE AND RODENTICIDE ACT
EPA REG. NO. 100-100000-100000
EPA REG. NO. 100-100000-100000
SUBJECT
TO ADDITIONAL COMMENTS

Useful against non-vol flies, beetles, non-corn borers when used as directed.

CAUTION

KEEP OUT OF REACH OF CHILDREN. Careful if swallowed. Do not take internally. Avoid contamination of food. Avoid getting chemical in eyes; or on skin, in case of contact immediately flush eyes thoroughly with plenty of water for at least 15 minutes and get medical attention.

GILLY CHEMICAL COMPANY
2501 Avenue B
Lubbock, Texas 79402

(Note: precautionary labeling will meet your state requirements set forth under Section 7. Precautionary labeling. Upon acceptance of labeling, printed label will be made, six-point required.)

Small handwritten mark or stamp at the bottom left corner.

(Back panel)

SWIMCIDE

Prevents objectionable odors, color or cloudiness caused by algae in swimming pools.

Softens water, no smell, no chlorine bleaching action.

Compatible with all the usual water treatment chemicals.

DIRECTIONS

When pool is first put in operation, add six ounces (8 fl oz) SWIMCIDE per 10,000 gallons of water in pool.

When algae growth is first visible in a pool already in operation, add 11 ounces (14.7 fl oz) per 10,000 gallons of water (8.25 ppm). After addition of the 11 ounce (14.7 fl oz) dose, the precipitated algae must be vacuumed out and the maintenance dose added immediately.

To maintain pool, add 3 ounces (4.7 fl oz) per 10,000 gallons every two weeks (2.25 ppm), or as required under conditions of pool use.

For disinfecting locker room surfaces, such as benches, floors, tables and walls, apply with a mop or a sponge, a solution containing one ounce SWIMCIDE per five gallons of water.

APPLICATION: Sprinkle SWIMCIDE on surface from various locations around pool or pour quantity into surface intake of filter well.
