Dear Mr. Mendoza:

Subject: Labeling per PR Notice 91-7
Purge II Concentrated Aerosol Insect Killer
EPA Reg. No.: 9444-01
Purge II Insecticide
EPA Reg. No.: 9444-06
Purge II Concentrated Aerosol Insect Killer 200mg
EPA Reg. No.: 9444-08
Purge II Insecticide 100mg
EPA Reg. No.: 9444-09
Purge 5/24 Insecticide
EPA Reg. No. 9444-11
Purge 5/24 Insecticide 200mg
EPA Reg. No. 9444-14
Submission: April 27, 1992

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable subject to the comments listed below. One copy of the finished labeling must be submitted prior to releasing the product for shipment.

Except for 9444-01, the subject products contain the word "New" in their name. Current EPA policy provides the use of this term only for the first six months ~~on revised formulations~~. Since these products have all been registered beyond this time frame, the continued use of this phrase is not appropriate. Remove "new" from these names.

Use the correct, complete product name on each label. A pesticide is misbranded if it is offered for sale under the name of another pesticide FIFRA Sec. 2(q)(1)(C). You may not use the same name on several different registrations.

Sincerely,

Richard F. Mountfort
Product Manager 10
Insecticide & Rodenticide Branch
Registration Division (H7505C)

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS & DOMESTIC ANIMALS
CAUTION

Do not use in nurseries or rooms where infants, ill or aged persons are confined. Large drafts of forced ventilation may reduce or eliminate the insecticidal efficacy of these installations. Do not install directly over any food handling or dispensing area. Do not allow spray to contact plastic, painted or varnished surfaces.

Physical or Chemical Hazards

CAUTION: Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperature above 130°F may cause bursting.

INGREDIENT STATEMENT: Purge II Insecticide contains a highly effective insecticide formulation specially designed for use in automatic mist dispensing units in non-residential food handling establishments, commercial or institutional kitchens, dining areas and pantries of restaurants, supermarkets, food plants, food warehouses, bottling plants, hospitals, hotels, motels, stores, dairies, stables, nursing homes, day-care centers, egg and milk handling areas of dairies and chicken houses, where flies, mosquitoes, small flying moths and gnats are an annoyance.

STORAGE & DISPOSAL

Do not contaminate water, food or feed by storage or disposal.
STORAGE: Store in a cool, dry area away from heat or open flame.
DISPOSAL: Do not reuse empty container. Replace cap, wrap empty container in newspaper and discard in trash. Do not puncture or incinerate.

Authorized for use under USDA Inspection and Grading Program.

 Made in U.S.A.

UPC SYMBOL

purge™ II
INSECTICIDE

ACTIVE INGREDIENTS:

Pyrethrins	1.00%
* Piperonyl Butoxide, technical	2.00%
N-octyl bicycloheptane dicarboximide	3.34%
INERT INGREDIENTS	93.66%
	100.00%

* Equivalent to 1.6% (butylcarbityl)(6-propylpiperonyl) ether and 0.4% related compounds.

CONTAINS PETROLEUM DISTILLATES

KEEP OUT OF REACH OF CHILDREN

CAUTION

See Back Panel for Additional Precautionary Statements.
 EPA Reg. No. 9444-1 EPA Est. No. 9444-LA-1

NET WEIGHT 10 oz / 284 g

DIRECT

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For Use in Aerosol Dispenser: Install for each 6,000 cubic feet. Dispenser activates the mist. After two hours of operation, the mist will settle in the air to kill a substantial number of flies and gnats present.

Usually the effectiveness of this product is achieved within one hour after the Dispenser is activated. If control is required, the Dispenser should be used for one hour before control is desired. No longer needed. Keep in mind that the rate, size of space treated, and the number of flies and gnats affect insect activity and control. One cubic foot should be considered as one cubic foot. Adjustments made dependent on the type of usage. As with any method, the best results are achieved when sanitation and other pest control practices are followed.

This 10 oz can contains approximately 1000 sprays to sustain operation for a total of 24 hours (on a 24-hour basis) or 64 days (on a 12-hour basis) that the container be changed.

PRECAUTIONARY STATEMENTS

**Hazards to Humans & Domestic Animals
CAUTION**

Do not use in nurseries or rooms where infants, ill or aged persons are confined. Large drafts of forced ventilation may reduce or eliminate the insecticidal efficacy of these installations. Do not install directly over any food handling or dispensing area. Do not allow spray to contact waste painted or varnished surfaces.

Physical or Chemical Hazards

Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For Use in Aerosol Dispensers. One dispenser unit should be installed for each 12,000 cubic feet of space to be treated. The Dispenser activates the metered valve once every 15 minutes. After two hours of operation, enough insecticide is suspended in the air to kill a substantial proportion of the flies, mosquitoes and gnats present.

Usually the effectiveness of this product will be noticeable within one hour after the Dispenser is activated. If less than 24 hour control is required, the Dispenser should be set to start one hour before control is desired and run one hour after control is no longer needed. Keep in mind that such factors as air flow rate, size of space treated, humidity and room temperature all affect insect activity and control. Therefore, one unit per 12,000 cubic feet should be considered as an average rate with adjustments made depending on specific conditions at place of usage. As with any method of insect control, best results are achieved when sanitation and other positive insect-prevention practices are followed.

This 16 oz can contains approximately 3,100 "shots" sufficient to sustain operation a total of 780 hours (32 days when on a 24 hour basis) or 64 days on a 12-hour basis. It is suggested that the container be changed once a month (once every 2 months on a 12-hour basis).
