

[9444-5]

ACCEPTED
9-29-71
FOR THE FEDERAL BUREAU OF INVESTIGATION
FOR LABORATORY USE ONLY
NO. 9444-5

INGREDIENT STATEMENT: New Purge Concentrated Aerosol Insect Killer contains a highly effective insecticide formulation specially designed for use in automatic mist dispensing units around food handling establishments, Restaurants, Stores, Dairies, Barns, Motels; Hotels, Hospitals, Food Processing Establishments and other areas where flies, gnats, flying moths, mosquitoes are an annoyance.

ACTIVE INGREDIENTS:	
Pyrethins	0.90%
Piperonyl Butoxide Technical*	9.00%
Petroleum Distillate	10.10%
	20.00%
*INERT INGREDIENTS	80.00%
	100.00%

*Equivalent to 7.2% (butylcarbityl) (6-propyl-piperonyl) ether and 1.8% related compounds.

CAUTION: Do not use in nurseries or rooms where infants, ill or aged persons are confined. Large drafts of forced ventilation may reduce or eliminate the insecticidal efficacy of these installations. Do not install directly over any food handling or dispensing area.

CAUTION: CONTENTS UNDER PRESSURE; DO NOT STORE ABOVE 130°F.; MAY CAUSE BURSTING. NEVER THROW CONTAINER INTO FIRE OR INCINERATOR. DO NOT PUNCTURE.

100 mg.

CAUTION: KEEP OUT OF REACH OF CHILDREN
see side panel for additional cautions

FOR USE IN AUTOMIZER: One Automizer unit should be installed for each 6,000 cubic feet of space to be treated. The Automizer activates NEW PURGE'S 100mg. valve once every 15 minutes; after two hours of operation, enough NEW PURGE is suspended in the air to kill a substantial proportion of the flies, mosquitoes and gnats present.

Usually the effectiveness of NEW PURGE will be noticeable within one hour after the Automizer is activated. If less than 24 hour control is required, the Automizer should be set to start one hour before control is desired and run one hour after control is no longer needed. Keep in mind that such factors as air flow rate, size of space treated, humidity and room temperature all affect insect activity and control. Therefore, one unit per 6,000 cubic feet should be considered as an average need with adjustments made depending on specific conditions at place of usage. As with any method of insect control, best results are achieved when sanitation and other positive insect-prevention practices are followed.

This 12-oz. can of NEW PURGE contains approximately 3,300 "shots" sufficient to sustain operation for a total of 825 hours (34 days on around the clock basis) or 68 days on a 12-hour basis. When used on a 24-hour basis, it is suggested that the container be changed once a month (once every 2 months on a 12-hour basis).
