

PRECAUTIONARY STATEMENTS

CAUTION:

Hazards to Humans: Do not use in nurseries or rooms where infants, ill or aged persons are confined. Do not install directly above or within 12' of any food handling or dispensing area.

Physical or Chemical Hazards: Contents under pressure. Do not use or store near heat or flame. Do not puncture or incinerate container. Exposure to temperatures above 130° F may cause bursting. Do not allow spray to contact plastic, painted or varnished surfaces.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This product contains a highly effective insecticide designed especially for use in automatic dispensers. The dispenser activates the 52 mg valve every 15 minutes. Usually the effectiveness of this product will be noticeable within one hour after the Dispenser is activated. If less than 24 hour control is required, the Dispenser should be set to start one hour before control is desired and run one hour after control is no longer needed. Keep in mind that such factors as air flow rate, size of space treated, humidity and room temperature will affect insect activity and control. Therefore, one unit per 6,000 cubic feet should be considered an average need with adjustments made depending on specific conditions at place of usage. As with any method of insect control, best results are achieved when sanitation and other positive insect-prevention practices are followed.
