28 MAY 1992

Ruben Mendoza
Waterbury Companies, Inc.
100 Calhoun Street
P.O. Box 640
Independence, LA 70443

Dear Mr. Mendoza:

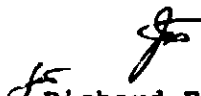

Subject: Labeling per PR Notice 91-7
Purge II Concentrated Aerosol Insect Killer
EPA Reg. No.: 9444-01
Purge II Insecticide
EPA Reg. No.: 9444-06
Purge II Concentrated Aerosol Insect Killer 200mg
EPA Reg. No.: 9444-08
Purge II Insecticide 100mg
EPA Reg. No.: 9444-09
Purge 5/24 Insecticide
EPA Reg. No. 9444-11
Purge 5/24 Insecticide 200mg
EPA Reg. No. 9444-14
Submission: April 27, 1992

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable subject to the comments listed below. One copy of the finished labeling must be submitted prior to releasing the product for shipment.

Except for 9444-01, the subject products contain the word "New" in their name. Current EPA policy provides the use of this term only for the first six months ~~on revised formulations~~. Since these products have all been registered beyond this time frame, the continued use of this phrase is not appropriate. Remove "new" from these names.

Use the correct, complete product name on each label. A pesticide is misbranded if it is offered for sale under the name of another pesticide FIFRA Sec. 2(q)(1)(C). You may not use the same name on several different registrations.

Sincerely,

Richard F. Mountfort
Product Manager 10
Insecticide & Rodenticide Branch
Registration Division (H7505C)

"After"

ECFPA011-6 Rev. 4/92 (PNI 442)

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS & DOMESTIC ANIMALS
CAUTION

Do not use in nurseries or rooms where infants, ill or aged persons are confined. Large drafts of forced ventilation may reduce or eliminate the insecticidal efficacy of these installations. Do not install directly over, or within 12 feet of any food handling or dispensing area. This dispenser must not be used in establishments that are open for 19 hours or longer. Use only when insect infestation exists.

Physical or Chemical Hazards
CAUTION Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperature above 130F may cause bursting. Never throw container into fire or incinerator.

100 mg
INGREDIENT STATEMENT. New Purge 5/24 Insecticide contains a highly effective insecticide formulation specially designed for use in automatic mist dispensing units around food handling establishments, restaurants, hospitals, hotels, motels, stores, dorms, barns, and food processing establishments, where flies, mosquitoes, small flying moths and gnats are an annoyance.

STORAGE & DISPOSAL
 Do not contaminate water, food or feed by storage or disposal.
STORAGE: Store in a cool, dry area away from heat or open flame.
DISPOSAL: Do not reuse empty container. Replace cap, wrap empty container in newspaper and discard in trash. Do not puncture or incinerate.

DIRECT

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

One Model CB 5/24 "After" timed dispensing unit should be placed in a 100 cubic foot of space to be treated. One hour of operation. Insert a 24 oz can of New Purge 5/24 Insecticide. The Dispenser activates the unit after 15 minutes for one 5 hour cycle of operation, enough insecticide is dispensed to kill a substantial proportion of the insects present. Keep in mind that the space treated, humidity and temperature affect activity and control. As with all insecticides, good prevention practices are fundamental.

The CB 5/24 is an automatic "After Hours" augmentation of your existing pest control dispenser.

This 24 oz can contains enough insecticide to treat every 60 days. SEE FULL SERVICE CONTAINER FOR

NET WEIGHT 12 oz / 340 g

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

One Model CB 5/24 "After Hours" Automatic "once a day" timed dispensing unit should be installed for each 6,000 cubic feet of space to be treated. Set dispenser timer for desired hour of activation. Insert aerosol. Put switch in "ON" position. Dispensers should be located high, at least 7-8 feet from floor. The Dispenser activates the 100 mg metered valve once every 15 minutes for one 5 hour period every 24 hours. After one hour of operation, enough insecticide is suspended in the air to kill a substantial proportion of the flies, mosquitoes and gnats present. Keep in mind that such factors as air flow rate, size of space treated, humidity and room temperature all affect insect activity and control. As with any method of insect control, best results are achieved when sanitation and other positive insect prevention practices are followed.

The CB 5/24 is an automatic, unattended, effective "After Hours" augmentation of your insect control procedures. Exposed food should be covered prior to activation period of the dispenser.

This 12 oz can contains approximately 3,000 "shots". It is suggested that the dispensing unit be serviced and checked every 60 days. SEE FULL INSTRUCTIONS FOR USE AND SERVICE CONTAINED IN EACH CB 5/24 DISPENSER.
