PURGE™ AIR SANITIZER

**FOR REDUCTION OF
 AIR-BORNE BACTERIA,
 UNDESIRABLE ODORS**

Directions for Use
GENERAL CLASSIFICATION
 It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
 Air Sanitizer is a highly effective formulation specially designed for use in the timed, intermittent aerosol dispensing unit for the reduction of airborne bacteria and undesirable odors. Recommended for use in waiting, reception rooms, locker rooms, rest rooms of hospitals, theaters, shops.
 Remove cap of can and operate in sequential aerosol dispenser with spray "load bearing" actuator, nozzle facing front.
 Factors such as air currents, temperature, humidity and configuration of treated area govern number of units required for effective control. One unit should normally treat 8,000 cubic feet of closed air space. Dispenser location should be at a height of 8 feet and directed compatibly to air currents in closed area. One can, used on a 24-hour basis, will provide air sanitizing for a 23-day service cycle.
