Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

[Product Name] is an effective formulation specially designed for use in the timed, intermittent aerosol dispensing unit for the reduction of air-borne bacteria which can cause undesirable odors. Recommended for use in lobbies, reception rooms, locker rooms, rest rooms of hospitals, theaters or shops.

[For Metered Application] Remove cap from can and place in [sequential] [metered] aerosol dispenser with spray head beneath actuator, nozzle facing front.

Factors such as air currents, temperature, humidity and conformation of treated area govern number of units required for effective control. One unit should normally treat 6,000 cubic feet of closed air space. Dispenser location should be at a height of [7] [7-8] [8] feet and directed compatibly to air currents in closed areas. One can, used on a 24-hour basis, will provide adequate air sanitizing.

[For Handheld Application] Spray for one second toward center of room, away from drapes, walls, plastic, vinyl, painted or varnished surfaces, etc. to reduce airborne bacteria in an average size room (10' x 14' x 8'). Repeat application several times daily.

Storage & Disposal

Do not contaminate water, food or feed by storage and disposal.

Storage: Store in a cool dry place away from heat or open flame.

Disposal: Do not Puncture or Incinerate! **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency or 1800-CLEANUP for disposal instructions.
