DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

SHAKE WELL BEFORE USING:

Remove protective cap, point valve opening away from face.

Indoor: For use in homes. Kills houseflies, mosquitos and gnats. Close all doors and windows. Point nozzle upward. Direct spray mist to all parts of the room, especially windows and other light sources which attract these insects. Fill the room with mist, then leave the treated area. Keep the room closed for at least 15 minutes. Ventilate the room when treatment is completed.

Outdoors: Reduce mosquitos, gnats (midgits), houseflies, deerflies, horse flies and flying moths (millers) by spraying their resting areas. Follow precautions listed below. Hold container 18 to 24 inches from shrubs, bushes and grassy areas. Spray these areas with a slow sweeping motion at the rate of 1 to 3 seconds per cubic yard of space, while moving away from the treated areas. To reduce annoyance from these flying insects, treat open porches and patios in a similar manner. Spray only when the air is still. Allow spray to dissipate before occupying the treated area. Repeat as necessary.

CRAWLING INSECTS: Roaches, earwigs, and spiders. Spray thoroughly into hiding places such as cracks, crevices, and spaces opening around pipes and sinks, under refrigerators, baseboards and storage areas. Spray directly on insects where possible.

STORAGE & DISPOSAL

Do not contaminate water, food or feed by storage or disposal.
STORAGE: Store in a cool dry place away from heat or open flame.

DISPOSAL: Do not reuse empty container. Replace cap, wrap container and put in trash collection.
