WATERBURY

CRACK & CREVICE INJECTION USE ONLY

PRECAUTIONARY STATEMENTS

Hazards to Humans & Domestic Animals

CAUTION

May be harmful if swallowed, inhaled, or absorbed through the skin. Avoid breathing of spray mist and provide adequate ventilation of area being treated. Contact with skin, eyes, or clothing should also be avoided. Wash thoroughly after using. Avoid contamination of food, utensils and food preparation areas. Should illness occur, get prompt medical aid. To Physician: Atropine Sulfate is antidotal.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds and other wildlife. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on the label.

STATEMENT OF PRACTICAL TREATMENT

If Swallowed: Drink 1 or 2 glasses of water and induce vomiting by touching back of the throat with finger. Repeat until vomit fluid is clear. Call a physician immediately. Do not induce vomiting or give anything by mouth to an unconscious person. If In Eyes: Flush eyes with plenty of water. Call a physician if irritation persists. If on Skin: Remove contaminated clothing and immediately wash skin with soap and water. If Inhaled: Remove victim to fresh air and apply respiration if necessary.

PHYSICAL OR CHEMICAL HAZARDS

Contents under pressure. Do not puncture or incinerate container. Do not use or store near heat or open flame. Exposure to temperatures above 130°F may cause bursting. Do not spray on plastic, painted or varnished surfaces or directly into any electronic equipment such as radios, televisions, computers, etc.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This insecticide is for use only with injection tube and for injecting into cracks and crevices where insects may be hiding, living and breeding. Place injector tip 1/2 inch into cracks, crevices, holes and other small openings where insects may be a problem. Release approximately 1 second spray per spot. In serious infestation, if possible, place spots approximately 12 inches apart. In light infestation or preventative treatment, place spots approximately 3 feet apart. See the additional directions below for effective control of specified insects.

CRAWLING PESTS: Cockroaches, Waterbugs, Spiders, Ticks, Earwigs, Crickets, Sowbugs, Millipedes, and Centipedes: Spray into hiding places such as cracks and crevices, moist areas, openings around pipes and sinks, under refrigerators, behind baseboards, coffee makers, meter boxes and man-holes. Spray directly on insects in these locations where possible. Repeat as necessary.

BOOKLICE & SILVERFISH: Spray cracks and crevices in baseboards, doorframes, bookcases and storage areas. Spray directly on insects in these locations where possible. Repeat as necessary.

ANTS: Spray into nests, trails, and points of entry around doors, windows, structural cracks and crevices. Spray directly on insects in these locations where possible. Repeat as necessary.

GRAINWEEVILS, FLOUR BEETLES, CHOCOLATE MOTHS, DRUGSTORE BEETLES (in exposed adult and larval stages) and hibernating stages of BOXELDER BUGS, ELM LEAF BEETLES, CLUSTER FLIES and CLOVER MITES: Contact as many insects as possible when treating infested areas such as cracks and crevices in wall voids, around windows and doorframes, under siding, in machinery and in dark, secluded areas. Repeat as necessary.

Localized treatment of wood destroying insects: TERMITES, CARPENTER ANTS and CARPENTER BEES—Locate source of infestation. Inject 5-10 second spray into insect tunnels and cavities. In infested sites, pilot holes should be drilled eight to ten inches apart to insure thorough insecticide gallery treatment. Make sure not to contact electrical wiring, plumbing, etc. when drilling and never use metal wood injectors where electrical shock could occur. Use standard plastic void injector if there is danger of electrical contact. The purpose of this treatment is to kill workers or winged reproductive forms which may be present in the treated channels and spaces at the time of treatment. Application of this product is not a substitute for other professional termite treatments applied by a certified pest control operator. For CARPENTER BEES, seal entrance openings with small pieces of stainless steel wool after spray application.

RED IMPORTED FIRE ANTS: To treat, use the especially designed soil injector nozzle. Locate fire ant mounds in places such as school yards, parks, playgrounds, and church grounds. To quiet active ants on mound surface, begin spraying 1 inch from the surface of the mound in a circular motion, then continue spraying while inserting the nozzle into the mound and as far as possible. Inject the mound at 3-8 sites, including the center of the mound, with 5-10 second sprays per site. Mounds of less than 12 inches in diameter would require 5 second sprays per site; greater than 12 inches in diameter would require 10 second sprays per site. For best results, spray in cool weather, 65-80°F or in early morning or late evening. Repeat treatment as necessary and as new mounds appear.

APPLICATIONS WITHIN FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS

Limited to Crack & Crevice Treatment Only. Apply a small amount of material directly into cracks and crevices such as expansion joints between different elements of construction or between equipment bases and the floor, wall voids, motor housing, junction boxes or switch boxes, conduits or hollow equipment legs where insects hide. Care should be taken to avoid depositing the product onto exposed surfaces or introducing the material into the air. Avoid contamination of food or food processing surfaces. Applications of this product in the food areas of food handling establishments, other than as a crack and crevice treatment, are not permitted.

STORAGE & DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in a cool, dry area away from heat or open flame.

DISPOSAL: This container may be recycled in the few but growing number of communities where steel aerosol can recycling is available. Before offering for recycling, empty the can by using the product according to the label. DO NOT PUNCTURE! If recycling is not available, wrap the container and discard in the trash.

WARNING: Contains 1,1,1-trichloroethane a substance which harms public health and the environment by destroying ozone in the upper atmosphere.

Authorized for use under USDA Inspection & Grading Programs.

Manufactured by WATERBURY COMPANIES, INC. P. O. Box 1812 Waterbury, CT 06722 Made in USA

Dursban CRACK & CREVICE INSECTICIDE

KILLS: Cockroaches, Waterbugs, Spiders, Ticks, Earwigs, Crickets, Sowbugs, Millipedes, Centipedes, Booklice, Silverfish, Ants, Grain Weevils, Flour Beetles, Chocolate Moths, Drugstore Beetles, Boxelder Bugs, Elm Leaf Beetles, Clover Mite, Cluster Flies, Termites, Carpenter Ants, Carpenter Bees and Fire Ants

FOR USE IN Hospitals, Supermarkets, Motels, Hotels, Homes, Transportation Equipment (Buses, Boats, Ships, Trains, Planes), Utilities, Meat Packing and Food Processing Plants, Food Storage Areas, Restaurants and Other Food Handling Establishments

ACTIVE INGREDIENT:

* Chlorpyrifos [0,0-diethyl 0-(3,5,6-trichloro-2-pyridyl) phosphorothioate] 0.50%

INERT INGREDIENTS 99.50% 100.00%

* Dursban is a Reg. TM of DowElanco. U.S. Pat. No. 3,244,586

KEEP OUT OF REACH OF CHILDREN

CAUTION
