Explanation: Use additional page(s) if necessary. (For section I and Section II.) I am submitting this notification in which an addition of the number of sprays per space for metered valve (handheld use) was added to the label because some of our production will include metered valves instead of the regular valve system. Some pest control companies want to use a handheld metered system in order to avoid overapplication of insecticides and for tracking and quantifying amounts of insecticides being used. The label will remain the same keeping all use sites, methods of application, and precautionary statements. This similar request was done w/ EPA Reg. # 9444-41, CB-40 Insectic.
