**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**FOR USE IN** Food handling and food preparation areas of restaurants and food processing plants, stores, farms, dairies, barns, kennels, factories, schools, hotels, motels, offices, ships, planes, supermarkets, food warehouses, bottling plants, hospitals, nursing homes, day-care centers, milk and egg handling areas of dairies and chicken houses.

This product contains a highly effective insecticide designed especially FOR USE IN automatic dispensers. The dispenser activates the 50 mg metered valve every 15 minutes. Usually the effectiveness of this product will be noticeable within one hour after the Dispenser is activated. If less than 24 hour control is required, the Dispenser should be set to start one hour before control is desired and run one hour after control is no longer needed. Keep in mind that such factors as airflow rate, size of space treated, humidity and room temperature all affect insect activity and control. Therefore, one unit per 6,000 cubic feet should be considered as an average need with adjustments made depending on specific conditions at place of usage. As with any method of insect control, best results are achieved when sanitation and other positive insect prevention practices are followed.

It is suggested that the container be changed once a month.

Authorized for use under USDA Inspection & Grading Programs.
