

JUL 26 2005

Cynthia L. Rohner
WATERBURY Companies, Inc.
P.O. Box 640/129 Calhoun Street
Independence, LA 70443

Subject: CB Purge III
EPA Registration No. 9444-158
Letter dated March 16, 2005

Dear Ms. Rohner:

The proposed amendment to the registration for the product cited above under The Federal Insecticide, Fungicide And Rodenticide Act as amended revising the label by adding a claim for effectiveness against mosquitoes which may carry West Nile Virus is acceptable subject to the comments listed below:

The referenced studies are sufficient for the preliminary acceptance of the requested label claim for mosquitoes including those that may transmit WNV. The following label language is acceptable:

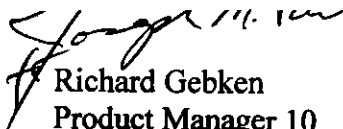

“Kills and repels Flies, Mosquitoes [including Culex species] which/that may carry/transmit the West Nile Virus], Gnats and Small Flying Moths.”

However, due to the unacceptable control mortalities observed in the latter study, confirmatory data are necessary. Corroborative data must be submitted or cited within 12 months of the date of this letter.

In addition the label claim, “Lasts 30 Days”, must be deleted and replaced with, “Container lasts for up to 3 applications. Approximately 2.12 oz. (60g) is dispensed at each metered interval.”. This determination is based upon information provided by you. Refer to the enclosed Efficacy review for details.

The label must also be revised as follows:

Delete the statement, “Authorized by USDA for Use in Federally Inspected Meat and Poultry Plants.”. USDA no longer reviews labeling or authorizes products for use in these plants.

Richard Gebken
Product Manager 10
Insecticide Branch
Registration Division (7505C)

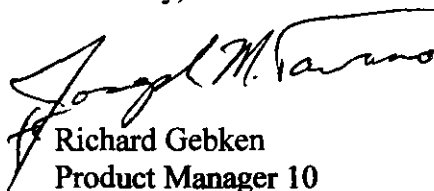

2/5

A copy of the Efficacy review is enclosed for your records.

A stamped copy of the draft label is enclosed. This label supercedes all previously accepted labels. Submit two copies of the finished corrected label.

If you have any questions please contact Joseph Tavano at (703) 305-6411.

Sincerely,

Richard Gebken
Product Manager 10
Insecticide Branch
Registration Division (7505C)

**PRECAUTIONARY STATEMENTS
Hazards to Humans & Domestic Animals**

CAUTION

Do not use in nurseries or rooms where infants, ill or aged people are confined. Do not install directly above or within 12 feet of any food handling or dispersing area. Metering device must be timed so that it does not dispense while food processing is underway. Foods should be removed or covered in such a way as to prevent contamination. All food processing surfaces should be covered during treatment or washed with an effective cleaning compound followed by potable water rinse.

[For Reviewer: Boxed and "bulleted" format will be used if label space permits; otherwise a paragraph format will be used.]

FIRST AID

If Swallowed: Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice

If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If In Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

HOT LINE NUMBER- Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For emergency information, call (985) 878-6751, Monday through Friday, 8:00 am to 4:30 pm CST. After 4:30pm call your poison control center. For product information call (203) 597-1812, Monday-Friday, 8:00 am to 5:00 pm EST.

NOTE TO PHYSICIAN- Contains petroleum distillate - vomiting may cause aspiration pneumonia.

[For Reviewer: Note to Physician- will be used for formulations containing ≥10% petroleum distillates]

PHYSICAL OR CHEMICAL HAZARDS

Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting. Do not allow spray to contact plastic, painted or varnished surfaces.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

FOR USE IN [ON] Food handling and food preparation areas of restaurants and food processing plants, stores, farms, dairies, barns, kennels, factories, schools, hotels, motels, offices, ships, planes (cargo area), supermarkets food warehouses, bottling plants, hospitals, nursing homes, day-care centers, [porch] [&] [patio], homes, milk and egg handling areas of dairies and chicken houses.

This product contains a highly effective insecticide designed especially **FOR USE IN** automatic dispensers. The dispenser activates the metered valve every 15 minutes. Usually the effectiveness of this product will be noticeable within one hour after the Dispenser is activated. If less than 24 hour control is required, the Dispenser should [be set to] start one hour before control is desired and run one hour after control is no longer needed. Keep in mind that factors such as airflow rate, size of space treated, humidity and room temperature affect insect activity and control. Therefore, one unit per 6,000 cubic feet of unobstructed space should be considered as an average with adjustments made depending on specific conditions at usage site. As with any method of insect control, best results are achieved when sanitation and other positive insect prevention practices are followed.

not use in aircraft cabins. It is suggested that the container be changed once a month.

OUTDOORS: This product can be used to treat dog kennels, dog runs, side yards, patios, decks & [and] residential landscapes. Set the dispenser to treat at dawn & [and] dusk & [and] use when humans are not in the area. When heavy pest infestations are present the dispenser may be set to treat at [15], [30], [45] [15 – 45] minute intervals. Place the dispensers out of the reach of pets & [and] children & [and] use the prevailing wind to assist in carrying the spray throughout the area to be treated. This product can be used to control [aid in controlling] Flies, Mosquitoes, [including the Culex species] [which may carry] [that may carry] [that carry] [which carry] [and transmit] [the West Nile Virus] [including those that [carry] West Nile Virus], gnats & [and] small flying moths. Each dispenser will treat up to 650 square feet. Use enough dispensers to treat the entire area you want protected.

OPERATION: Remove protective cap from top of can & [and] insert can in dispenser. Secure dispenser at least 7 feet from floor or ground & [and] at a point where air flow or wind will carry the particles throughout the area to be protected.

Authorized for use under USDA Inspection and Grading Programs.

STORAGE & DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Storage: Do not store near heat or open flame. Store in cool dry area away from children.

Disposal: Do not Puncture or Incinerate! **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency or 1800-CLEANUP for disposal instructions.
