DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

FOR USE IN non-residential food handling establishments, commercial or institutional kitchens, dining areas and pantries of restaurants, supermarkets, food plants, food warehouses, bottling plants, hospitals, hotels, motels, stores, dairies, stables, nursing homes, day-care centers, egg and milk handling areas of dairies and chicken houses.

Purge II contains a highly effective insecticide formulation especially designed for use in automatic metered dispensers.

FOR USE WITH Automatic Metered Dispenser: One dispenser unit should be installed for each 6,000 cubic feet of unobstructed space to be treated. The Dispenser activates the metered valve once every 15 minutes. Effectiveness of Purge II will be noticeable within one hour after the Dispenser is activated. Recommended use is for 24 hour control; but if less than 24 hour control is required, the Dispenser should be set to start one hour before control is desired and run one hour after control is no longer needed. Factors such as airflow rate, size of space treated, humidity and room temperature affect insect activity and control. Therefore, one unit per 6,000 cubic feet of unobstructed space should be considered as an average with adjustments made depending on specific conditions at usage site. As with any method of insect control, best results are achieved when sanitation and other positive insect prevention practices are followed.

It is suggested that the container be changed once a month (when operated on a 24-hour basis).
