UNITED STATES ENVIRONMENTAL PROTECTION AGENCY  
WASHINGTON, D.C. 20460

APR 13 2001

Cynthia L. Rohner  
Registration Specialist  
Waterbury Companies, Inc.  
129 Calhoun Street/P.O. Box 640  
Independence, LA 70443

Subject: Label Amendment (MOA)  
CB STRIKEFORCE HPX II RESIDUAL WITH DURSBAN (Chlorpyrifos)  
EPA Reg. No. 9444-184  
Resubmission dated April 4, 2001, "acceptable with comments"

Dear Ms. Rohner:

The Agency has reviewed your submission for a revised label, and the following comments apply:

- 1) You must use the following language for the TERMITES use:  
"such applications are not a substitute for mechanical alterations, soil treatment or foundation treatment but are merely a supplement. For active termite infestation, get a professional inspection"
- 2) You must submit the final printed label before releasing the product to market.

A stamped copy of the label "accepted with comments" is enclosed for your records.  
Please submit three (3) copies of the final printed label for our files prior to releasing the product for shipment. If you have any questions please call me at (703) 308-8328.

Sincerely yours,

A handwritten signature in black ink that reads "Akiva Abramovitch".

Akiva Abramovitch, Ph.D.  
Chemist  
Insecticide-Rodenticide Branch  
Registration Division (7505C)

**Restricted Use Pesticide**

For retail sale to and use only by Certified Applicators or persons under their direct supervision and only for those uses covered by the Certified Applicator's certification.

**CB**  
**STRIKEFORCE HPX II**  
**RESIDUAL WITH DURS** **ACCEPTED**  
**With COMMENTS**  
**In EPA Letter Dated:**  
**APR 13 2001**

- Provides Control for Wood Destroying Organisms
- Solvent-Based Insecticide

**Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 9444-184**

Active ingredient:

*Chlorpyrifos: [O, O-diethyl O-(3,5,6-trichloro-2 pyridyl) phosphorothioate.....	0.50%
**Inert ingredients.....	99.50%
	100.00%

\*Dursban is a Registered Trademark of DowElanco. U.S. Patent No. 3,244,586

\*\*Contains Petroleum Distillates.

Contains No CFCs or Other Ozone Depleting Substances. Federal Regulations Prohibit CFC Propellants in Aerosols.

**KEEP OUT OF REACH OF CHILDREN**  
**CAUTION**

See Back Panel for Additional Precautionary Statements.

.....

**CRACK & CREVICE INJECTION USE ONLY**

**PRECAUTIONARY STATEMENTS  
Hazards to Humans & Domestic Animals  
CAUTION**

May be harmful if swallowed, inhaled, or absorbed through the skin. Avoid breathing of spray mist and provide adequate ventilation of area being treated. Contact with skin, eyes, or clothing should also be avoided. Wash thoroughly after using. Should illness occur, get prompt medical aid.

**Personal Protective Equipment (PPE)-**

**Applicator and other handlers** should wear a minimum of long-sleeved shirt and long pants, socks, shoes, and chemical-resistant gloves. In addition, all pesticide handlers (mixers, loaders and applicators) are recommended to wear a respiratory protection device and protective eyewear when working in a non-ventilated space.

**ENVIRONMENTAL HAZARDS**

This pesticide is toxic to birds and wildlife, and extremely toxic to fish and aquatic organisms. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to aquatic organisms in adjacent aquatic sites. Cover or incorporate spills. Do not contaminate water by cleaning of equipment or disposal of equipment washwaters.

**First Aid**

**If swallowed:** Call a physician or Poison Control Center immediately. Do not induce vomiting. Contains an aromatic petroleum solvent. Do not give anything by mouth to an unconscious person.  
**If in eyes:** Flush eyes with plenty of water. Call a physician if irritation persists.  
**If on skin:** Wash with plenty of soap and water. Get medical attention if irritation persists.  
**If inhaled:** Remove victim to fresh air if symptoms of cholinesterase inhibition appear. If not breathing, give artificial respiration, preferably mouth-to-mouth. Get medical attention immediately.  
**Note to physician:** Chlorpyrifos is a cholinesterase inhibitor. Treat symptomatically. If exposed, plasma and red blood cell cholinesterase tests may indicate significance of exposure (baseline data are useful). Atropine, only by injection, is the preferable antidote. Oximes, such as 2-PAM/protopam, may be therapeutic if used early; however, use only in conjunction with atropine. In case of severe acute poisoning, use antidote immediately after establishing an open airway and respiration.

**PHYSICAL OR CHEMICAL HAZARDS**

Flammable. Contents under pressure. Keep away from heat, sparks, and open flames. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting. Do not spray on plastic, painted or varnished surfaces or directly into any electronic equipment such as radios, televisions, computers, etc.

4/4

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For use on outside structures only. Spot treatments are allowed only where there is clear evidence that reinfestation or barrier disruption has occurred. Spot treatments not to exceed 25% of the amount required to treat the entire structure at the label rate. The maximum end-use dilution is 0.5% active ingredient. Areas treated with 0.5% or less must be inspected annually for signs of reinfestation.

This product cannot be used for spot and local treatments to existing structures after 12/31/02.

#### LOCALIZED INDOOR TREATMENT -

**For treatment of wood destroying insects in Industrial and Manufacturing Plants Only: For Control of CARPENTER ANTS and CARPENTER BEES-** Locate source of infestation. Inject 5-10 second spray into insect tunnels and cavities. In infested sites, pilot holes should be drilled eight to ten inches apart to insure thorough insecticide gallery treatment. Make sure not to contact electrical wiring, plumbing, etc. when drilling and never use metal wood injectors where electrical shock could occur. Use standard plastic void injector if there is danger of electrical contact. The purpose of this treatment is to kill workers or winged reproductive forms, which may be present in the treated channels and spaces at the time of treatment. Application of this product must not be interpreted as a substitute for other professional treatments applied by a certified pest control operator. For **CARPENTER BEES**, seal entrance openings with small pieces of stainless steel wool after spray application.

**Pest Control Outdoors [Terrestrial Non-Food, Domestic Outdoor]: To Control Fire Ant Mounds-** To treat; use the especially designed soil injector nozzle. To quiet active ants on mound surface, begin spraying 1 inch from the surface of the mound in a circular motion, then continue spraying while inserting the nozzle into the mound as far as possible. Inject the mound at 3-6 sites, including the center of the mound, with 5-10 second sprays per site. Mounds of less than 12 inches in diameter would require 5-second sprays per site; greater than 12 inches in diameter would require 10-second sprays per site. For best results, spray in cool weather, 65-80°F or in early morning or late evening. Repeat treatment as necessary and as new mounds appear.

#### OUTDOOR NON-RESIDENTIAL USE-

**For Control of Wood Infesting Insects [Terrestrial Non-Food]: TERMITES-** Locate source of infestation. Inject 5-10 second spray into insect tunnels and cavities. In infested sites, pilot holes should be drilled eight to ten inches apart to insure thorough insecticide gallery treatment. Make sure not to contact electrical wiring, plumbing, etc. when drilling and never use metal wood injectors where electrical shock could occur. Use standard plastic void injector if there is danger of electrical contact. The purpose of this treatment is to kill workers or winged reproductive forms, which may be present in the treated channels and spaces at the time of treatment. Application of this product must not be interpreted as a substitute for other professional termite treatments applied by a certified pest control operator.

### STORAGE & DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

**STORAGE:** Store in cool, dry area away from heat or open flame.

**DISPOSAL:** This container may be recycled in the few but growing number of communities where steel aerosol can recycling is available. Before offering for recycling, empty the can by using the product according to the label. **DO NOT PUNCTURE!** If recycling is not available, wrap the container and discard in the trash.
