U.S. ENVIRONMENTAL PROTECTION AGENCY
Office of Pesticide Programs
Registration Division (H7505C)
401 "M" St., S.W.
Washington, D.C. 20460

EPA Reg. Number: 9444-201
Date of Issuance: JUN 30 1998

NOTICE OF PESTICIDE:

- Registration
- Reregistration

Term of Issuance: Unconditional

Name of Pesticide Product:
Intruder II Residual with
Cyfluthrin

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Waterbury Companies, Inc.
129 Calhoun Street
Independence, LA 70443

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is unconditionally registered in accordance with FIFRA sec. 3(c)(5). Once a pesticide is registered, however, it is not regarded as permanently acceptable. Registration does not eliminate the need for continual reassessment of pesticides. If the Agency determines that, at any time, additional data are required to maintain in effect an existing registration, the Agency will require submission of such data under FIFRA section (3) (c) (2) (B).

1. Make the following label changes below before you release the product for shipment:

- a. Revise the EPA Registration Number to read, "EPA Reg. No.9444-201".
- b. On the front panel, qualify the control of termites by adding "above-ground" i.e., "Wood Infesting Pests-Above-Ground Termites" (Subterranean, Formosan, Drywood)

Signature of Approving Official:

Date:

c. Inform the user that control of subterranean termites above-ground is not a substitute for soil treatment by adding the following sentence before the sentence beginning, "Termite carton nests" :

"These applications are not a substitute for mechanical alteration, soil treatment or foundation treatment but merely a supplement for controlling active infestations of subterranean termites."

2. Submit two copies of the revised final printed label for the record.

With respect to similarity in acute toxicity for the subject product and EPA Registration No. 9444-183, we conclude that the products are substantially similar. The precautionary labeling for EPA Reg. No. 9444-183 is also appropriate for this product.

A stamped copy of the label is enclosed for your records.

Sincerely,

George LaRocca
Product Manager (13)
Insecticide Branch
Registration Division (7505C)

Enclosure

PRECAUTIONARY STATEMENTS
Hazards to Humans & Domestic Animals
CAUTION

Harmful if absorbed through the skin, eyes, or clothing. Wash thoroughly with soap and water after handling. Do not contaminate food or feed. Do not apply directly to food. Do not apply to classrooms when in use. Do not apply this product in occupied patient rooms or in any rooms while occupied by the elderly or infirm.
STATEMENT OF PRACTICAL TREATMENT: If On Skin: Wash with plenty of soap and warm water. Get medical attention if irritation persists. If Inhaled: Remove victim to fresh air. Apply respiration if indicated. If Swallowed: Call a physician or Poison Control Center. Note to Physicians: Inducing vomiting as first aid for this product may result in increased risk of chemical pneumonia or pulmonary edema caused by aspiration of the hydrocarbon solvent. Vomiting should be induced only under professional supervision.
PHYSICAL OR CHEMICAL HAZARDS: Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting. Do not use in the vicinity of open flame or pilot lights.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do Not Use As A Space Spray. Spray on surfaces only. Hold container upright while spraying. Direct nozzle approximately 12 inches from surface to be treated. Spray away from self and other persons. Do not allow children in treated area until spray has dried. Do not use in aircraft cabins.

PERMITTED AREAS OF USE INCLUDE, BUT ARE NOT LIMITED TO:
RESIDUAL PEST CONTROL: Homes, apartment buildings, laboratories, hospitals (nonoccupied patient areas), nursing homes (nonoccupied patient areas), hotels, motels, kennels, stables, schools, nurseries, stores, warehouses, restaurants, kitchens, cafeterias, dairies, dairy products processing plants, milk storage rooms, supermarkets, egg processing plants, bakeries, bottling plants, wineries and similar structures, breweries, institutions, manufacturing canneries, frozen food plants, cereal processing and manufacturing plants, pickle factories, grain mills, granaries, spice plants, food manufacturing, processing and servicing establishments.
Storage: Commercial, industrial, apartment, office, storage buildings.
CRACK AND CREVICE AND SPOT APPLICATION: Cockroaches, Spiders, Crickets, Silverfish, Firebrats. Do not spray directly on plastic, painted, varnished surfaces or into any electronic equipment such as radios, televisions, computers, etc. For Crack and Crevice—Use injector (1), releasing approximately 1 second spray per spot. For serious infestations, spray spots approximately 12 inches apart; for light infestations, spray approximately 3 feet apart. Spray into hiding places such as cracks, crevices, moist areas, openings around pipes and sinks, under refrigerators, behind baseboards, coffee makers, meter boxes, and manholes. For Spot Spray—Apply directly on insects in these locations when possible. Repeat as necessary. Spot treatments may also be made to areas including, but not limited to, storage areas, closets, around water pipes, doors and windows, behind and under refrigerators, cabinets, sinks, stoves and other equipment, the underside of shelves, drawers and similar areas.

CRAWLING INSECTS: Sowbugs, Pillbugs, Millipedes, Centipedes, Bedbugs, Earwigs and Ticks—Apply around doors and windows and other places where these pests may be found or where they may enter premises. Spray baseboards, storage areas and other locations. Spray around foundations and corners. Repeat as necessary.
FLYING INSECTS: Wasps, Bees, Yellow Jackets and Hornets—Application to nests should be made late in the evening when insects are at rest. Apply directly. Thoroughly spray nest, entrance and surrounding areas where insects may land or rest. Flies, Mosquitoes, Gnats, Flying and Clothes Moths—Use as a surface spray only. Apply directly to walls, ceilings, window screens, and other flying insect resting areas as a residual surface treatment. May be used inside residential buildings, as well as, in and around carpools, garages, and storage sheds.

Ants: Apply to any trails, around doors and windows and other places where ants may be found.
PANTRY PESTS: Carpet, Confused, Red Flour, Drugstore, Cigarette, Sawtoothed and Merchant Grain Beetles and Lesser Grain Borers—Contact as many insects as possible when treating infested areas such as cracks and crevices in wall voids, around windows and door frames, under siding, in masonry and in dark secluded areas. Repeat as necessary. For long lasting residual action allow residue to remain undisturbed as this product will keep on killing for weeks. For control of above-ground termites in localized areas, apply to woods and galleries in damaged wood, and in spaces between wooden structural members and between the sill plate and foundation where wood is vulnerable. Applications may be made to inaccessible areas by drilling, and then injecting with a void injector into the damaged wood or wall voids. Termiticidal nests in building voids may be injected using a void injector. It is desirable to physically remove carton nest material from building voids when such nests are found. This type of applicator is intended to be a supplemental treatment for control of drywood and above-ground subterranean termites and other wood-inesting insects.

For control of carpenter ants in houses and other structures, spray as a general surface, spot, crack and crevice or wall void application. Repeat treatments when necessary. Apply around doors and windows and other places where carpenter ants may enter the premises. Spray into cracks and crevices or through small drilled holes into voids where these ants or their nests are present. Use a sufficient amount of coarse spray to cover the area. For control of carpenter bees in structures, spray the liquid directly into gallery entrance holes. Following treatment, the entrance holes may be left open 24 hours to be certain that returning adult bees are killed. When there is no activity, the hole may be sealed with a suitable sealant.

APPLICATION WITHIN FOOD AREAS AND NON-FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS
FOOD HANDLING ESTABLISHMENTS

Places other than private residences in which food or feed is held, processed, prepared, or served.
1. FOOD AREAS (INCLUDING SOME SERVING AREAS)
Includes areas for receiving, storage, packing (canning, bottling, wrapping, boxing), preparing edible waste storage and enclosed processing systems (mills, dairies, edible oils, syrups). Also includes some SERVING AREAS.
FOOD SERVING AREAS: SERVING AREAS are facilities where food is served, such as dining rooms, but not where food is prepared or held. These areas are considered FOOD AREAS when food is exposed and the facility is in operation.

Follow application directions in this section, if food is not exposed and facility is not in operation, follow application directions under NON-FOOD SERVING AREAS below.

Use Restrictions: FOOD AREA application is limited to CRACK AND CREVICE TREATMENT ONLY. Applications to other areas are not permitted.

Application Directions: Apply in small amounts directly into cracks and crevices using void injector directly into and crevices. In points between elements of construction, between equipment and floor openings leading to voids and hollow spaces in walls, equipment legs and bases, conduits, motor housing and electrical switch boxes where insects hide. Care should be taken to avoid depositing the product onto exposed surfaces or introducing the material into the air. Avoid contamination of food or food processing surfaces. Do not apply directly to food. Reapplications may be made at 10-day intervals.

2. NONFOOD AREAS (INCLUDING SOME SERVING AREAS)
Includes garbage rooms, lavatories, floor drains (to sewer, airless and ventless), offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after cleaning) and bottling. Also includes some SERVING AREAS.

NONFOOD SERVING AREAS: SERVING AREAS are facilities where food is served, such as dining rooms, but not where food is prepared or held. These areas are considered NONFOOD AREAS when food is not exposed and the facility is not in operation. Follow application directions in this section. If food is exposed and the facility is in operation, follow application directions under FOOD SERVING AREAS.

Application Directions: Apply as a spot treatment to sensitive surfaces such as baseboards, under elements of construction into cracks and crevices. Avoid treating surfaces likely to be contacted by food. In the home, cover all food handling surfaces and cover or remove all food and cooking utensils, or wash thoroughly after treatment.

OTHER NONFOOD AREAS: Application Directions: Apply to baseboard areas, around water pipes, surfaces behind and beneath sinks, lockers, tables, pallets and similar areas where insects hide or through which they may enter.

STORAGE & DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. **STORAGE:** Store in a cool, dry area away from heat or open flame. **DISPOSAL:** This container may be recycled in the low but growing number of communities where steel aerosol can recycling is available. Before offering for recycling, empty the can by using the product according to the label. DO NOT PUNCTURE! If recycling is not available, wrap the container and discard in the trash.

INTRUDER™ II

Residual with Cyfluthrin

- Provides Rapid Control of Residential and Industrial Pests
- Quick Knockdown • Solvent System

KILLS: CRAWLING INSECTS—Cockroaches, Ants, Spiders, Crickets, Silverfish, Sowbugs, Pillbugs, Millipedes, Centipedes, Firebrats, Earwigs, Bedbugs and Ticks; **FLYING INSECTS—**Wasps, Bees, Flies, Yellowjackets, Hornets, Gnats, Mosquitoes, Flying and Clothes Moths; **PANTRY PESTS—**Carpet Confused, Red Flour, Drugstore, Cigarette, Sawtoothed and Merchant Grain Beetles, and Lesser Grain Borers; **WOOD INFESTING PESTS—**Termites (Subterranean, Formosan, Drywood), Carpenter Ants and Carpenter Bees.

PERMITTED AREAS OF USE INCLUDE, BUT ARE NOT LIMITED TO: Homes, Apartment Buildings, Laboratories, Hospitals (nonoccupied patient areas), Nursing Homes (nonoccupied patient areas), Institutions, Hotels, Motels, Kennels, Stables, Schools, Nurseries, Stores, Warehouses, Aircraft (except Aircraft Cabins), Buses, Trucks, Trailers, Marine Vessels, Sailors; Commercial, Industrial, Office, Storage Buildings, Restaurants, Kitchens, Cafeterias, Dairies, Dairy Product Processing Plants, Milk Storage Rooms, Supermarkets, Egg Processing Plants, Bakeries, Bottling Plants, Wineries and Similar Structures, Breweries, Manufacturing Canneries, Frozen Food Plants, Cereal Processing and Manufacturing Plants, Pickle Factories, Grain Mills, Granaries, Spice Plants, Food Manufacturing, Processing and Servicing Establishments

ACTIVE INGREDIENT:

Cyfluthrin (CAS# 68359-37-5)	0.10%
Pyrethrins	0.05%
Piperonyl Butoxide, technical	1.00%
OTHER INGREDIENTS	98.85%
	100.00%

Equivalent to 0.80% (butylcarbityl) (6-propylpiperonyl) ether and 0.20% of related compounds

Contains Petroleum Distillates

Contains No CFCs or Other Ozone Depleting Substances. Federal Regulations Prohibit CFC Propellants in Aerosols.

KEEP OUT OF REACH OF CHILDREN
CAUTION

See Back Panel For Additional Precautionary Statements.
