

U.S. ENVIRONMENTAL PROTECTION AGENCY
Office of Pesticide Programs
Registration Division (H7505C)
401 "M" St., S.W.
Washington, D.C. 20460

EPA Reg. Number:

9444-202

Date of Issuance:

JUL 9 1999

NOTICE OF PESTICIDE:

Registration

Reregistration

(under FIFRA, as amended)

Term of Issuance: Conditional

Name of Pesticide Product:

Strikeforce II Residual
Withrsban

Name and Address of Registrant (include ZIP Code):

Mr. Ruben Mendoza
Waterbury Companies, Inc.
129 Calhoun Street
P.O. Box ~~60~~ 640
Independence, Louisiana 70443

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data or other material required for registration/re-registration of your product under FIFRA sec. 3(c)(5) or FIFRA sec. 4 when the Agency requires all registrants of similar products to submit such data.
2. Make the labeling changes listed below before you release the product for shipment:
 - a. Add the phrase "EPA Registration No. "9444-202".

Signature of Approving Official:

Dani Daniel
Insecticide-Rodenticide Branch
Registration Division (7505C)

Date:

JUL 9 1999

Page Two

9444-202

3. Submit two (2) copies of your final printed labeling before you release the product for shipment.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Enclosure:

JUL 9 1999

Under the Federal Insecticide,
Fungicide, and Rodenticide Act,
as amended, for the pesticide
registered under EPA Reg. No.
9444-202

CRACK & CREVICE INJECTION USE ONLY

**PRECAUTIONARY STATEMENTS
Hazards to Humans & Domestic Animals
CAUTION**

May be harmful if swallowed, inhaled, or absorbed through the skin. Avoid breathing of spray mist and provide adequate ventilation of area being treated. Contact with skin, eyes, or clothing should also be avoided. Wash thoroughly after using. Avoid contamination of food, utensils and food preparation areas. Should illness occur, get prompt medical aid.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds and other wildlife. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on the label.

STATEMENT OF PRACTICAL TREATMENT

If Swallowed: Call a doctor or get medical attention. Do not induce vomiting. Do not give anything by mouth to an unconscious person. Avoid alcohol.
If in Eyes: Flush eyes with plenty of water. Call a physician if irritation persists.
If on Skin: Remove contaminated clothing and immediately wash skin with soap and water.
If Inhaled: Remove victim to fresh air and apply respiration if necessary. Note to Physician -- If symptoms of cholinesterase inhibition are present, Atropine Sulfate is antidotal. Contains petroleum distillate. Vomiting may cause aspiration pneumonia.

PHYSICAL OR CHEMICAL HAZARDS

Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting. Do not spray on plastic, painted or varnished surfaces or directly into any electronic equipment such as radios, televisions, computers, etc.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not use in aircraft cabins. This insecticide is for use only with injection tube and for injecting into cracks and crevices where insects may be hiding, living and breeding. Place injector tip 1/8 inch into cracks, crevices, holes and other small openings where insects may be a problem. Release approximately 1 second spray per spot. In serious infestation, if possible, place spots approximately 12 inches apart. In light infestation or preventative treatment, place spots approximately 3 feet apart. See the additional directions below for effective control of specified insects.

CRAWLING PESTS: Cockroaches, Waterbugs, Spiders, Ticks, Earwigs, Crickets, Sowbugs, Millipedes, and Centipedes—Spray into hiding places such as cracks and crevices, moist areas, openings around pipes and sinks, under refrigerators, behind baseboards, and meter boxes. Spray directly on insects in these locations where possible. Repeat as necessary.

BOOKLICE & SILVERFISH: Spray cracks and crevices in baseboards, doorframes, bookcases and storage areas. Spray directly on insects in these locations where possible. Repeat as necessary.

ANTS: Spray into nests, trails, and points of entry around doors, windows, structural cracks and crevices. Spray directly on insects in these locations where possible. Repeat as necessary.

GRAIN WEEVILS, FLOUR BEETLES, CHOCOLATE MOTHS, DRUGSTORE BEETLES (in exposed adult and larval stages) and hibernating stages of BOXELDER BUGS, ELM LEAF BEETLES, CLUSTER FLIES and CLOVER MITES: Contact as many insects as possible when treating infested areas such as cracks and crevices in wall voids, around windows and doorframes, under siding, in machinery and in dark, secluded areas. Repeat as necessary.

Localized treatment of wood destroying insects: TERMITES, CARPENTER ANTS and CARPENTER BEES—Locate source of infestation. Inject 5-10 second spray into insect tunnels and cavities. In infested sites, pilot holes should be drilled eight to ten inches apart to insure thorough insecticide gallery treatment. Make sure not to contact electrical wiring, plumbing, etc. when drilling and never use metal wood injectors where electrical shock could occur. Use standard plastic void injector if there is danger of electrical contact. This type of application is intended to be a supplemental treatment for control of drywood and above-ground subterranean termites and other wood-infesting insects. The purpose of this treatment is to kill workers or winged reproductive forms which may be present in the treated channels and spaces at the time of treatment. For long lasting residual action allow residue to remain undisturbed as this product will keep on killing for weeks.

For control of above-ground termites in localized areas, apply to voids and galleries in damaged wood, and in spaces between wooden structural members and between the sill plate and foundation where wood is vulnerable. Applications may be made to inaccessible areas by drilling, and then injecting with a void injector into the damaged wood or wall voids. Termite carton nests in building voids may be injected using a void injector. It is desirable to physically remove carton nest material from building voids when such nests are found. For control of carpenter ants in houses and other structures, apply as a general surface, spot, crack and crevice or wall void application. Repeat treatments when necessary. Apply around doors and windows and other places where carpenter ants may enter the premises. Spray into cracks and crevices or through small drilled holes into voids where these ants or their nests are present. Use a sufficient amount of coarse spray to cover the area. For control of carpenter bees in structures, spray the liquid directly into gallery entrance holes. Following treatment, the entrance holes may be left open 24 hours to be certain that returning adult bees are killed. When there is no activity, the hole may be sealed with a suitable sealant.

RED IMPORTED FIRE ANTS: To treat, use the especially designed soil injector nozzle. Locate fire ant mounds in places such as school yards, parks, playgrounds, and church grounds. To quiet active ants on mound surface, begin spraying 1 inch from the surface of the mound in a circular motion, then continue spraying while inserting the nozzle into the mound as far as possible. Inject the mound at 3-6 sites, including the center of the mound, with 5-10 second sprays per site. Mounds of less than 12 inches in diameter would require 5 second sprays per site; greater than 12 inches in diameter would require 10 second sprays per site. For best results, spray in cool weather, 65-80°F or in early morning or late evening. Repeat treatment as necessary and as new mounds appear.

APPLICATIONS WITHIN FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS Limited to Crack & Crevice Treatment Only. Apply a small amount of material directly into cracks and crevices such as expansion joints between different elements of construction or between equipment bases and the floor, wall voids, motor housing, junction boxes or switch boxes, conduits or hollow equipment legs where insects hide. Care should be taken to avoid depositing the product onto exposed surfaces or introducing the material into the air. Avoid contamination of food or food processing surfaces. Applications of this product in the food areas of food handling establishments, other than as a crack and crevice treatment, are not permitted.

STORAGE & DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. **STORAGE:** Store in a cool, dry area away from heat or open flame. **DISPOSAL:** This container may be recycled in the few but growing number of communities where steel aerosol can recycling is available. Before offering for recycling, empty the can by using the product according to the label. DO NOT PUNCTURE! If recycling is not available, wrap the container and discard in the trash.

Strikeforce II™

Residual with Dursban

- Provides Residual Control of Residential and Industrial Pests
- Solvent-Based Insecticide

KILLS: Cockroaches, Waterbugs, Spiders, Ticks, Earwigs, Crickets, Sowbugs, Millipedes, Centipedes, Booklice, Silverfish, Ants, Grain Weevils, Flour Beetles, Chocolate Moths, Drugstore Beetles, Boxelder Bugs, Elm Leaf Beetles, Clover Mites, Cluster Flies; **WOOD INFESTING PESTS-** Termites (Subterranean, Formosan, Drywood), Carpenter Ants and Carpenter Bees.

FOR USE IN Hospitals, Supermarkets, Motels, Hotels, Homes, Transportation Equipment (Buses, Boats, Ships, Trains, Planes [cargo areas]), Utilities, Meat Packing and Food Processing Plants, Food Storage Areas, Restaurants and Other Food Handling Establishments

ACTIVE INGREDIENT:

*Chlorpyrifos (CAS# 2921-88-2)	0.50%
**OTHER INGREDIENTS	99.50%
	100.00%

*Dursban® is a Reg. TM of DowElanco. U.S. Pat. No. 3,244,586

** Contains Petroleum Distillates.

Contains No CFCs or Other Ozone Depleting Substances.
Federal Regulations Prohibit CFC Propellants in Aerosols.

**KEEP OUT OF REACH OF CHILDREN
CAUTION**
