UNITED STATES ENVIRONMENTAL PROTECTION AGENCY  
WASHINGTON, D.C. 20460

OFFICE OF  
PREVENTION, PESTICIDES  
AND TOXIC SUBSTANCES

Cynthia L. Rohner  
Waterbury Companies, Inc.  
P.O. Box 640/129 Calhoun Street  
Independence, LA 70443

APR 13 2004

Dear Ms. Rohner:

Subject: Amendment to Master Labeling  
Invader II Residual With Propoxur  
EPA Registration No. 9444-204  
Submission Date: February 3, 2004

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable with the following provisions:

- 1) Move the following statement to the NOTE TO PHYSICIAN portion of the FIRST AID section of the label: "Atropine Sulfate is antidotal."
- 2) Add the following statement to the FIRST AID section of the label: "Contains methyl carbamate that inhibits cholinesterase."

Please note that, with the acceptance of this label amendment, the official product name for this product has been changed to Invader II Residual With Propoxur. Please use this product name in all future correspondences with the Agency regarding this product.

A stamped copy is enclosed for your records. Please submit one (1) final printed copy for the referenced label, incorporating the above changes, before releasing the product for shipment. If you have any questions regarding this letter, please contact Kable Bo Davis at (703) 306-0415.

Sincerely yours,

Daniel C. Kenny  
Product Manager  
Insecticide-Rodenticide Branch  
Registration Division (7505C)

DATE ▶	4/13/04							

ACCEPTED  
with COMMENTS  
In EPA Letter Dated:

214

APR 13 2004  
Under the Federal Insecticide,  
Fungicide, and Rodenticide Act,  
as amended, for the pesticide  
registered under EPA Reg. No.  
9444-204

CB<sup>®</sup>

# INVADER<sup>®</sup> II RESIDUAL WITH PROPOXUR

Low 20% VOC Formulation

- Provides Rapid Control of Residential and Industrial Pests
- Quick Knockdown

**KILLS:** Cockroaches, Waterbugs, Spiders, Brown Dog Ticks, Earwigs, Crickets, Sowbugs, Millipedes, Centipedes, Booklice, Silverfish, Ants, Grain Weevils, Flour Beetles, Chocolate Moths, Drugstore Beetles, Boxelder Bugs, Elm Leaf Beetles, Clover Mites, Cluster Flies; **WOOD INFESTING PESTS-** Termites (Subterranean, Formosan, Drywood), Carpenter Ants and Carpenter Bees.

**FOR USE IN** Hospitals, Supermarkets, Motels, Hotels, Homes, Transportation Equipment (Buses, Boats, Ships, Trains, Trucks, Aircraft), Utilities, Meat Packing and Food Handling Establishments, Schools, Warehouses, Restaurants and Other Commercial Buildings

**ACTIVE INGREDIENT:**

Propoxur (CAS# 114-26-1).....	1.00%
OTHER INGREDIENTS.....	99.00%
	100.00%

Contains no CFCs or Other Ozone Depleting Substances. Federal Regulations  
Prohibit CFC Propellants in Aerosols.

KEEP OUT OF REACH OF CHILDREN  
CAUTION

See Back Panel for Additional Precautionary Statements.

EPA Reg. No. 9444-204

EPA Est. No. 9444-LA-1

**NET WEIGHT 20 oz / 567 g**

## CRACK AND CREVICE INJECTION USE ONLY

### PRECAUTIONARY STATEMENTS Hazards to Humans & Domestic Animals

#### CAUTION

Harmful if swallowed, inhaled, or absorbed through the skin. Avoid breathing of spray mist and provide adequate ventilation of area being treated. Personal protective equipment must include: long-sleeved shirt and long pants, chemical-resistant gloves, and shoes plus socks. Contact with skin, eyes or clothing should also be avoided. Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. Users should remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Wash thoroughly after using. Avoid contamination of food, utensils, and food preparation areas. Do not apply this product in a way that will contact any person or pet, either directly or indirectly. Keep people and pets out of the area during application. Should illness occur, get prompt medical aid. To Physician- Atropine Sulfate is antidotal.

[For Reviewer: Boxed and "bulleted" format will be used if label space permits; otherwise a paragraph format will be used.]

#### FIRST AID

**If Swallowed:** Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

**If Inhaled:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

**If on Skin or Clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

**If In Eyes:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

**HOT LINE NUMBER-** Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For emergency information, call (985) 878-6751, Monday through Friday, 8:00 am to 4:30 pm CST. After 4:30pm call your poison control center. For product information call (203) 597-1812, Monday-Friday, 8:00 am to 5:00 pm EST.

**NOTE TO PHYSICIAN-** Contains petroleum distillate - vomiting may cause aspiration pneumonia.

#### ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds and other wildlife. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes. Do not contaminate water when disposing of equipment washwaters. Apply this product only as specified on the label.

#### PHYSICAL OR CHEMICAL HAZARDS

Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting. Do not spray on plastic, painted or varnished surfaces or directly into any electronic equipment such as radios, televisions, computers, etc.

#### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This insecticide is for use only with injection tube and for injecting into cracks and crevices where insects may be hiding, living and breeding. Place injector tip ½ inch into cracks, crevices, holes and other small openings where insects may be a problem. Release approximately 1 second spray per spot. In serious infestations, if possible, place spots approximately 12 inches apart. In light infestations or preventative treatment, place spots approximately 3 feet apart. See the additional directions below for effective control of specified insects.

**CRAWLING PESTS: Cockroaches, Waterbugs, Spiders, Brown Dog Ticks, Earwigs, Crickets, Sowbugs, Millipedes, and Centipedes-Spray** into hiding places such as cracks and crevices, moist areas, openings around pipes and sinks, under refrigerators, behind baseboards, coffee makers, meter boxes and manholes. Spray directly on insects in these locations where possible. Repeat as necessary.

**BOOKLICE & SILVERFISH:** Spray cracks and crevices in baseboards, doorframes, bookcases and storage areas. Spray directly on insects in these locations where possible. Repeat as necessary.

**ANTS:** Spray into nests, trails and points of entry around doors, windows, structural cracks and crevices. Spray directly on insects in these locations where possible. Repeat as necessary.

**GRAIN WEEVILS, FLOUR BEETLES, CHOCOLATE MOTHS, DRUGSTORE BEETLES (in exposed adult and larval stages) and hibernating stages of BOXELDER BUGS, ELM LEAF BEETLES, CLUSTER FLIES and CLOVER MITES:**

Contact as many insects as possible when treating infested areas such as cracks and crevices in wall voids, around windows and doorframes, under siding, in machinery, and in dark, secluded areas. Repeat as necessary.

**For TERMITES:** Inject 5-10 seconds spray into insect tunnels and cavities. This application is not a substitute for mechanical alteration, soil treatment or foundation treatment but is merely a supplemental treatment. For control of

**above-ground termites** in localized areas, apply to voids and galleries in damaged wood, and in spaces between wooden structural members and between the sill plate and foundation where wood is vulnerable. Applications may be made to inaccessible areas by drilling, and then injecting with a void injector into the damaged wood or wall voids. Termite carton nests in building voids may be injected using a void injector. It is desirable to physically remove carton nest material from building voids when such nests are found. This type of application is intended to be a supplemental treatment for control of drywood and above-ground subterranean termites and other wood-infesting insects. This product is intended to kill workers or winged reproductive forms which may be present in the treated areas.

Localized treatment of wood destroying insects: **CARPENTER ANTS** and **CARPENTER BEES**-Locate source of infestation. Inject 5-10 seconds of spray into insect tunnels and cavities. For control of **carpenter ants** in houses and other structures, apply as a spot, crack and crevice or wall void application. Repeat treatments when necessary. Apply around doors and windows and other places where carpenter ants may enter the premises. Spray into cracks and crevices or through small drilled holes into voids where these ants or their nests are present. Use a sufficient amount of coarse spray to cover the area. For control of **carpenter bees in structures**, spray the liquid directly into gallery entrance holes. Following treatment, the entrance holes may be left open 24 hours to be certain that returning adult bees are killed. When there is no activity, the hole may be sealed with a suitable sealant.

**APPLICATIONS IN AIRCRAFT:** This product can be applied in cargo areas but not in occupied aircraft cabins, unless cabins are ventilated for (3) hours before reentering.

### APPLICATIONS WITHIN FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS

**Limited to Crack & Crevice Treatment Only.** Apply a small amount of material directly into cracks and crevices such as expansion joints between different elements of construction or between equipment bases and the floor, wall voids, motor housing, junction boxes or switch boxes, conduits or hollow equipment legs where insects hide. Care should be taken to avoid depositing the product onto exposed surfaces or introducing the material into the air. Avoid contamination of food or food processing surfaces. **Applications of this product in the food areas of food handling establishments, other than as a crack and crevice treatment, are not permitted.**

### STORAGE & DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

**Storage:** Do not store near heat or open flame. Store in cool dry area away from children.

**Disposal:** Do not Puncture or Incinerate! **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency or 1800-CLEANUP for disposal instructions.
