Subject: SaniCloth Plus Germicidal Disposal Cloth  
EPA Registration Number 9480-6  
Your Amendment Dated January 29<sup>th</sup>, 2004  
EPA Received Date January 29<sup>th</sup>, 2004

The amendment, submitted in connection with registration under the Federal sec. 3(c)(7)(A), to add the following two organisms: "Methicillin-Resistant Staphylococcus Aureus (MRSA)" and "Vancomycin-Resistant Enterococcus Faecalis(VRE)," is acceptable provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) and sec.4 when the Agency requires all registrants of similar products to submit such data.
2. Submit two (2) copies of final printed labeling before you release the product for shipment.

Confirmatory efficacy testing conducted according to Agency standards must be submitted for review and approval before the claim for effectiveness as a disinfectant and deodorizer against Hepatitis B virus can appear on the product labeling.

If these conditions are not complied with the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the labeling is enclosed for your records.

If you have any questions concerning this letter, please contact Karen M. Leavy-Munk at (703)-308-6237.

Sincerely yours,

A handwritten signature in cursive script that reads "M Swindell".

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

[Use one of the following as applicable to type of container.]

**[[TOWELETTE] [WIPE] [TOWEL]**

**[DISPENSER DIRECTIONS:**

To start feed: Remove lid and discard inner seal from canister. Find center of wipe roll, remove first wipe for use, twist corner of next wipe into a point and thread through the hole in the canister lid. Pull through about one inch. Replace lid. Dispense remaining wipes as necessary by pulling out at an angle. When not in use keep center cap of lid closed to prevent moisture loss.]

**[TRAVEL PACK:**

Peel back label slowly. Pull out wipes as needed and reseal label. Unfold wipe.]

Under the Federal Insecticide,  
Fungicide, and Rodenticide Act as  
amended, for the pesticide,  
registered under EPA Reg. No.

9480-6

[Use one or more of the following as appropriate; they may be used in any order as long as the entire paragraph is used; food contact directions must be used if "kitchen" is one of the areas of use or listed in the claims section.]

**TO DISINFECT:**

**NON FOOD CONTACT SURFACES**

Use a wipe to remove gross filth [or heavy soil]. Unfold a clean wipe and thoroughly wet surface. Treated surface must remain visibly wet for a full five (5) minutes. Use additional wipe(s) if needed to assure continuous 5 minute wet contact time. Let air dry.

[Kitchen Areas of Use section (shown on page 4) must be included on label if food contact directions below are used.]

**FOOD CONTACT SURFACES**

Use a wipe to remove gross filth [or heavy soil]. Unfold a clean wipe and thoroughly wet surface. Treated surface must remain visibly wet for a full five (5) minutes. Use additional wipe(s) if needed to assure continuous 5 minute wet contact time. Let air dry followed by a thorough potable water rinse.

**ULTRASOUND TRANSDUCERS**

For use on external surfaces of Ultrasound Transducers only

To disinfect: Pre-clean ultrasound gel from external transducer to be disinfected [by using a clean wash cloth]. Then thoroughly wet the probe with a towelette. Treated surface must remain visibly wet for a full five (5) minutes. Use additional wipe(s) if needed to assure continuous 5 minute contact time. Let air dry.

[At least one of the disinfection directions above must be used on the label in addition to the directions below.] [The following directions are for hospital/medical facility use labels only.]

**VIRUS\* OUTBREAKS** \*Influenza A2/Hong Kong, \*Herpes Simplex Type 2

[When either of the viruses listed above is the sole concern,] or [For specific outbreaks of either of the viruses listed above,] the following directions may be used: Use a wipe to remove gross filth [or heavy soil]. Unfold a clean wipe and thoroughly wet surface. Treated surface must remain visibly wet for one (1) minute. Let air dry. For food contact surfaces, follow one (1) minute contact time with a thorough potable water rinse. Although efficacy at a one (1) minute contact time has been shown to be adequate against the specific viruses listed above, this time is not sufficient for the non-viral organisms listed on the label. Therefore a 5 minute wet contact time must be used for all listed non-viral organisms.
