his product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to preclean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

Directions for use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Dispenser directions:

Canister directions:

To start feed: Remove lid and discard inner seal from canister. Find center of wipe roll, remove first wipe for use, twist corner of next wipe into a point and thread through the hole in the canister lid. Pull through about one inch. Replace lid. Dispense remaining wipes as necessary by pulling out at an angle. When not in use keep center cap of lid closed to prevent moisture loss. Travel pack directions:

Peel back label slowly. Pull out wipes as needed and reseal label. Unfold wipe.

To disinfect nonfood contact surfaces only:

Use a wipe to remove heavy soil. Unfold a clean wipe and thoroughly wet surface. Treated surface must remain visibly wet for a full five (5) minutes. Use additional wipe(s) if needed to assure continuous five (5) minute wet contact time. Let air dry.

Ultrasound transducers and probes:

For use on external surfaces of ultrasound transducers and probes only.

To disinfect: Pre-clean gel from external surface of ultrasound transducer or probe to be disinfected by using a clean washcloth. Then thoroughly wet the probe with a towelette. Treated surface must remain visibly wet for a full five (5) minutes. Use additional wipe(s) if needed to assure continuous five (5) minute wet contact time. Let air dry.

¹SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 AND HEPATITIS B VIRUS OF SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS Personal protection: When using this product, wear disposable protective gloves, protective gowns, face masks, or eye coverings as appropriate when handling HIV-1 (AIDS Virus) or Hepatitis B Virus (HBV) infected blood or body fluids.

Cleaning procedure: All blood and other body fluids must be thoroughly cleaned from surfaces and objects before disinfection by the germicidal wipe. Open, unfold first germicidal cloth to remove heavy soil.

Disposal of infections materials: Dispose of used towelette in accordance with local regulations for infectious waste disposal.

Contact time: Use second germicidal cloth to thoroughly wet surface. Allow to remain wet two (2) minutes, let air dry. Although efficacy at a two (2) minute contact time has been shown to be adequate against HIV-1 and Hepatitis B Virus this time is not sufficient for the other organisms listed on this label. Therefore a five (5) minute wet contact time must be used for other listed organisms.

To clean: Wipe surfaces and let air dry.
